AADR (*see* IADR/AADR)

ABSTRACTS
Divisional and Sectional Abstracts, 1000
Errata for abstracts, 1341
IADR Abstracts, 106

ACCREDITATION
Use of radiology practice guidelines and compliance with accreditation standards in US and Canadian dental schools. Kantor, M.L., 1532

ACETIC ACID
Effects of organic acid anions on growth, glycolysis, and intracellular pH of oral streptococci. Dashper, S.G. and Reynolds, E.C., 90

ACETYLCHOLINE
Choline acetyltransferase, acetylcholinesterase, and nicotinic acetylcholine receptors of human gingival and esophageal epithelia. Thuong Nguyen, V., *et al.*, 939

ACETYLCHOLINESTERASE
Choline acetyltransferase, acetylcholinesterase, and nicotinic acetylcholine receptors of human gingival and esophageal epithelia. Thuong Nguyen, V., *et al.*, 939

ACID ETCHING, DENTAL
Bond strength of resin to acid-etched dentin studied by ^{13}C NMR: interaction between N-methacryloyl-ω-amino acid primer and dentinal collagen. Nishiyama, N., *et al.*, 806
H^+-induced tension development in demineralized dentin matrix. Pashley, D.H., *et al.*, 1579

ACTINOBACILLUS ACTINOMYCETEMCOMITANS
Antigenic specificity of gingival crevicular fluid antibody to *Actinobacillus actinomycetemcomitans*. Ebersole, J.L., *et al.*, 1362

ACTINOMYCES
Oral colonization with *Actinomyces* species in infants by two years of age. Sarkonen, N., *et al.*, 864

ACTION POTENTIALS
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626

ACUTE-PHASE REACTION
Acute-phase inflammatory response to periodontal disease in the US population. Slade, G.D., *et al.*, 49

ADENOVIRIDAE
Adenoviral-mediated gene transfer to mouse salivary glands. Wang, S., *et al.*, 701
Immunolocalization and adenoviral vector-mediated manganese superoxide-dismutase gene transfer to experimental oral tumors. Lam, E.W.N., *et al.*, 1410

ADHESIVES
Effects of adhesive thickness on polymerization contraction stress of composite, The. Choi, K.K., *et al.*, 812
Interfacial chemistry of the dentin/adhesive bond. Spencer, P., *et al.*, 1458
Nominal shear or fracture mechanics in the assessment of composite-dentin adhesion? Tantbirojn, D., *et al.*, 41

AGE FACTORS
Age, dental infections, and coronary heart disease. Mattila, K.J., *et al.*, 756
Association of salivary flow rates with maximal bite force. Yeh, C.-K., *et al.*, 1560
Determination of variation of stimulated salivary flow rates. Ghezzi, E.M., *et al.*, 1874
Intra-oral distribution of dental fluorosis in Newburgh and Kingston, New York. Kumar, J., *et al.*, 1508
Low unstimulated salivary flow and subjective oral dryness: association with medication, anxiety, depression, and stress. Bergdahl, M. and Bergdahl, J., 1652

AGED
Age, dental infections, and coronary heart disease. Mattila, K.J., *et al.*, 756
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740
Mandibular bone formation rates in aged ovariectomized rats treated with anti-resorptive agents alone and in combination with intermittent parathyroid hormone. Hunziker, J., *et al.*, 1431
Relationship between the density of the alveolar processes and that of post-cranial bone, The. Southard, K.A., *et al.*, 964
Self-perceived oral health status, psychological well-being, and life satisfaction in an older adult population. Locker, D., *et al.*, 970

AIRWAY (*see* Respiratory System)

ALKALINE PHOSPHATASE
Cementum attachment protein enriches putative cementoblastic populations on root surfaces *in vitro*. BarKana, I., *et al.*, 1482
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

ALLOYS, DENTAL
High-temperature x-ray diffraction measurement of sanidine thermal expansion. Mackert, J.R., Jr., *et al.*, 1590

ALUMINUM
Crack initiation modes in bilayered alumina/porcelain disks as a function of core/veneer thickness ratio and supporting stiffness. Wakabayashi, N. and Anusavice, K.J., 1398
Lifetime-limiting strength degradation from contact fatigue in dental ceramics. Jung, Y.-G., *et al.*, 722

ALVEOLAR BONE
Osteoprotegerin and osteoclast differentiation factor in tooth eruption. Wise, G.E., *et al.*, 1937
Quantification of periapical bone destruction in mice by micro-computed tomography. Balto, K., *et al.*, 35

ALVEOLAR BONE LOSS
Collagenases in different categories of peri-implant vertical bone loss. Ma, J., *et al.*, 1870
Region-specific bone mass changes in rat mandibular condyle following ovariectomy. Tanaka, M., *et al.*, 1907
Relationship between the density of the alveolar processes and that of post-cranial bone, The. Southard, K.A., *et al.*, 964

ALVEOLAR PROCESS
Electron microscopy, micro-analysis, and x-ray diffraction characterization of the mineral-like tissue deposited by human cementum tumor-derived cells. Arzate, H., *et al.*, 28

AMELOBLASTOMA
Immunohistochemical detection and distribution of enamelysin (MMP-20) in human odontogenic tumors. Takata, T., *et al.*, 1608

AMELOBLASTS
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Cloning human enamelin cDNA, chromosomal localization, and analysis of expression during tooth development. Hu, C.-C., *et al.*, 912
Localization of EMSP1 expression during tooth formation and cloning of mouse cDNA. Hu, J.C.-C., *et al.*, 70
Mass spectrometry of native rat amelogenins: primary transcripts, secretory isoforms, and C-terminal degradation. Chen, W.-Y., *et al.*, 840

AMELOGENESIS
Dose-dependent modulation of octacalcium phosphate crystal habit by amelogenins. Wen, H.B., *et al.*, 1902
Immunohistochemical localization of Gαq, PLCβ, Gαi1-2, PKA, and the endothelin B and extracellular Ca^{2+}-sensing receptors during early amelogenesis. Moran, R.A., *et al.*, 1896

AMELOGENESIS IMPERFECTA
Cloning human enamelin cDNA, chromosomal localization, and analysis of expression during tooth development. Hu, C.-C., *et al.*, 912
Detection of a novel mutation in X-linked amelogenesis imperfecta. Kindelan, S.A., *et al.*, 1978
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

AMELOGENIN (*see* DENTAL ENAMEL PROTEINS)

AMINO ACID SEQUENCE
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740
Localization of EMSP1 expression during tooth formation and cloning of mouse cDNA. Hu, J.C.-C., *et al.*, 70
Mass spectrometry of native rat amelogenins: primary transcripts, secretory isoforms, and C-terminal degradation. Chen, W.-Y., *et al.*, 840
N-terminal sequence analysis of bovine dentin phosphophoryn after conversion of phosphoseryl to *S*-propylcysteinyl residues. Huq, N.L., *et al.*, 1914
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

ANODONTIA
Clinical, radiographic, and genetic evaluation of a novel form of autosomal-dominant oligodontia. Goldenberg, M., *et al.*, 1469

ANTHROPOLOGY
Her name is "Lucy," our three-million-year-old ancestor. Shields, E.D., 13

ANTI-INFECTIVE AGENTS
Antibacterial activities and release kinetics of a newly developed recoverable controlled agent-release system. Ehara, A., *et al.*, 824
Expression of the antimicrobial peptide, human β-defensin 1, in duct cells of minor salivary glands and detection in saliva. Sahasrabudhe, K.S., *et al.*, 1669
Interactions of human neutrophils with the constituents of an experimental dental biofilm, The. Shapira, L., *et al.*, 1802

ANTIBIOTICS, PEPTIDE
Expression of the antimicrobial peptide, human β-defensin 1, in duct cells of minor salivary glands and detection in saliva. Sahasrabudhe, K.S., *et al.*, 1669

ANTIBODIES
Antibodies against mycobacterial antigens in the synovial fluid of patients with temporomandibular disorders. Adachi, N., *et al.*, 1752
Antigenic specificity of gingival crevicular fluid antibody to *Actinobacillus actinomycetemcomitans*. Ebersole, J.L., *et al.*, 1362

AADR (*see* IADR/AADR)

Relationship between the density of the alveolar processes and that of post-cranial bone, The. Southard, K.A., *et al.*, 964

ALVEOLAR PROCESS
Electron microscopy, micro-analysis, and x-ray diffraction characterization of the mineral-like tissue deposited by human cementum tumor-derived cells. Arzate, H., *et al.*, 28

AMELOBLASTOMA
Immunohistochemical detection and distribution of enamelysin (MMP-20) in human odontogenic tumors. Takata, T., *et al.*, 1608

AMELOBLASTS
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Cloning human enamelin cDNA, chromosomal localization, and analysis of expression during tooth development. Hu, C.-C., *et al.*, 912
Localization of EMSP1 expression during tooth formation and cloning of mouse cDNA. Hu, J.C.-C., *et al.*, 70
Mass spectrometry of native rat amelogenins: primary transcripts, secretory isoforms, and C-terminal degradation. Chen, W.-Y., *et al.*, 840

AMELOGENESIS
Dose-dependent modulation of octacalcium phosphate crystal habit by amelogenins. Wen, H.B., *et al.*, 1902
Immunohistochemical localization of Gαq, PLCβ, Gαi1-2, PKA, and the endothelin B and extracellular Ca^{2+}-sensing receptors during early amelogenesis. Moran, R.A., *et al.*, 1896

AMELOGENESIS IMPERFECTA
Cloning human enamelin cDNA, chromosomal localization, and analysis of expression during tooth development. Hu, C.-C., *et al.*, 912
Detection of a novel mutation in X-linked amelogenesis imperfecta. Kindelan, S.A., *et al.*, 1978
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

AMELOGENIN (*see* DENTAL ENAMEL PROTEINS)

AMINO ACID SEQUENCE
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740
Localization of EMSP1 expression during tooth formation and cloning of mouse cDNA. Hu, J.C.-C., *et al.*, 70
Mass spectrometry of native rat amelogenins: primary transcripts, secretory isoforms, and C-terminal degradation. Chen, W.-Y., *et al.*, 840
N-terminal sequence analysis of bovine dentin phosphophoryn after conversion of phosphoseryl to *S*-propylcysteinyl residues. Huq, N.L., *et al.*, 1914
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

ANODONTIA
Clinical, radiographic, and genetic evaluation of a novel form of autosomal-dominant oligodontia. Goldenberg, M., *et al.*, 1469

ANTHROPOLOGY
Her name is "Lucy," our three-million-year-old ancestor. Shields, E.D., 13

ANTI-INFECTIVE AGENTS
Antibacterial activities and release kinetics of a newly developed recoverable controlled agent-release system. Ehara, A., *et al.*, 824
Expression of the antimicrobial peptide, human β-defensin 1, in duct cells of minor salivary glands and detection in saliva. Sahasrabudhe, K.S., *et al.*, 1669
Interactions of human neutrophils with the constituents of an experimental dental biofilm, The. Shapira, L., *et al.*, 1802

ANTIBIOTICS, PEPTIDE
Expression of the antimicrobial peptide, human β-defensin 1, in duct cells of minor salivary glands and detection in saliva. Sahasrabudhe, K.S., *et al.*, 1669

ANTIBODIES
Antibodies against mycobacterial antigens in the synovial fluid of patients with temporomandibular disorders. Adachi, N., *et al.*, 1752
Antigenic specificity of gingival crevicular fluid antibody to *Actinobacillus actinomycetemcomitans*. Ebersole, J.L., *et al.*, 1362

Immunohistochemical localization of Gαq, PLCβ, Gαi1-2, PKA, and the endothelin B and extracellular Ca^{2+}-sensing receptors during early amelogenesis. Moran, R.A., *et al.*, 1896
Immunoquantification of human salivary mucins MG1 and MG2 in stimulated whole saliva: factors influencing mucin levels. Rayment, S.A., *et al.*, 1765

ANTIBODIES, MONOCLONAL
Immunohistochemical detection and distribution of enamelysin (MMP-20) in human odontogenic tumors. Takata, T., *et al.*, 1608
Myosin isoform composition of the human medial and lateral pterygoid muscles. Korfage, J.A.M. and van Eijden, T.M.G.J., 1618

ANTIBODIES, VIRAL
Proviral HIV-1 DNA in gingival crevicular fluid of HIV-1-infected patients in various stages of HIV disease. Maticic, M., *et al.*, 1496

ANTIGENS
Antibodies against mycobacterial antigens in the synovial fluid of patients with temporomandibular disorders. Adachi, N., *et al.*, 1752
Antigenic specificity of gingival crevicular fluid antibody to *Actinobacillus actinomycetemcomitans*. Ebersole, J.L., *et al.*, 1362
Influence of environmental pH on the reactivity of *Candida albicans* with salivary IgA. Bikandi, J., *et al.*, 1439

ANXIETY
Effect of a cholecystokinin agonist on masseter muscle activity in the cat, The. Sitthisomwong, P., *et al.*, 1823
Low unstimulated salivary flow and subjective oral dryness: association with medication, anxiety, depression, and stress. Bergdahl, M. and Bergdahl, J., 1652
Relaxation *vs.* cognitively oriented therapies for dental fear. Berggren, U., *et al.*, 1645

AP-1 (*see* Transcription Factor AP-1)

APOPTOSIS
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948

ARTHRITIS
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489

AUTOCRINE COMMUNICATION
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

AUTORADIOGRAPHY
Inositol hexasulphate, a casein kinase inhibitor, alters enamel formation in cultured embryonic mouse tooth germs. Torres-Quintana, M.A., *et al.*, 1794

B-LYMPHOCYTES
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948

BACTERIA
Architecture of intact natural human plaque biofilms studied by confocal laser scanning microscopy. Wood, S.R., *et al.*, 21
pH of dental plaque in its relation to early enamel caries and dental plaque flora in humans, The. Lingström, P., *et al.*, 770
Relationship among mutans streptococci, "low-pH" bacteria, and iodophilic polysaccharide-producing bacteria in dental plaque and early enamel caries in humans. van Ruyven, F.O.J., *et al.*, 778
Road to preventive dentistry—the personal scientific experience of a Japanese dentist, The. Koga, T., 7

BACTERIAL ADHESION
Oral colonization with *Actinomyces* species in infants by two years of age. Sarkonen, N., *et al.*, 864
Water-insoluble glucan synthesis by mutans streptococcal strains correlates with caries incidence in 12- to 30-month-old children. Mattos-Graner, R.O., *et al.*, 1371

BACTERIAL INFECTIONS
Cytokine responses of oral epithelial cells to *Porphyromonas gingivalis* infection. Sandros, J., *et al.*, 1808
Interactions of human neutrophils with the constituents of an experimental dental biofilm, The. Shapira, L., *et al.*, 1802
Quantification of periapical bone destruction in mice by micro-computed tomography. Balto, K., *et al.*, 35

BEHAVIOR
Empirical test of the validity of the Oral Health Status Index (OHSI) on a minority population, An. Spolsky, V.W., *et al.*, 1983

BEREITSCHAFTSPOTENTIAL (*see* Contingent Negative Variation)

BIOCOMPATIBLE MATERIALS
Evidence of chemical bonding at biomaterial-hard tissue interfaces. Yoshida, Y., *et al.*, 709

BIOFILMS
Architecture of intact natural human plaque biofilms studied by confocal laser scanning microscopy. Wood, S.R., *et al.*, 21
Interactions of human neutrophils with the constituents of an experimental dental biofilm, The. Shapira, L., *et al.*, 1802

BIOLOGICAL MARKERS
AgNOR are sensitive markers of radiation lesions in squamous epithelia. Ielmini, M.V., *et al.*, 850
Immunohistochemical detection and distribution of enamelysin (MMP-20) in human odontogenic tumors. Takata, T., *et al.*, 1608
Meal pattern analysis in response to temporomandibular joint inflammation in the rat. Harper, R.P., *et al.*, 1704

BIOMECHANICS
Biomechanical evaluation of osseous implants having different surface topographies in rats. Ogawa, T., *et al.*, 1857
Mandibular helical axis pathways during mastication. Gallo, L.M., *et al.*, 1566
Region-specific bone mass changes in rat mandibular condyle following ovariectomy. Tanaka, M., *et al.*, 1907
Stress-field translation in the healthy human temporomandibular joint. Gallo, L.M., *et al.*, 1740

BIOMEDICAL ENGINEERING
Development and characterization of a tissue-engineered human oral mucosa equivalent produced in a serum-free culture system. Izumi, K., *et al.*, 798

BISPHENOL A-DIMETHACRYLATE
Estrogenicity of fissure sealants and adhesive resins determined by reporter gene assay. Tarumi, H., *et al.*, 1838

BISPHENOL A-GLYCIDYL METHACRYLATE
Estrogenicity of fissure sealants and adhesive resins determined by reporter gene assay. Tarumi, H., *et al.*, 1838

BISPHOSPHONATES (*see* Diphosphonates)

BITE FORCE
Association of salivary flow rates with maximal bite force. Yeh, C.-K., *et al.*, 1560
Biting and chewing in overdentures, full dentures, and natural dentitions. Fontijn-Tekamp, F.A., *et al.*, 1519

BLOTTING, NORTHERN
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Cyclooxygenase-2-dependent prostaglandin E_2 down-regulates intercellular adhesion molecule-1 expression *via* EP_2/EP_4 receptors in interleukin-1β-stimulated human gingival fibroblasts. Noguchi, K., *et al.*, 1955
Low levels of GRP-Ca expression in transgenic mice. Ten Hagen, K.G. and Balys, M.M., 926
Prostaglandin E_2 predominantly induces production of hepatocyte growth factor/scatter factor in human dental pulp in acute inflammation. Ohnishi, T., *et al.*, 748

BLOTTING, SOUTHERN
Expression of MMP-8 in human odontoblasts and dental pulp cells is down-regulated by TGF-β1, The. Palosaari, H., *et al.*, 77
Low levels of GRP-Ca expression in transgenic mice. Ten Hagen, K.G. and Balys, M.M., 926

BLOTTING, WESTERN
Antibodies against mycobacterial antigens in the synovial fluid of patients with temporomandibular disorders. Adachi, N., *et al.*, 1752
Antigenic specificity of gingival crevicular fluid antibody to *Actinobacillus actinomycetemcomitans*. Ebersole, J.L., *et al.*, 1362
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948
Expression of MMP-8 in human odontoblasts and dental pulp cells is down-regulated by TGF-β1, The. Palosaari, H., *et al.*, 77
Expression of the antimicrobial peptide, human β-defensin 1, in duct cells of minor salivary glands and detection in saliva. Sahasrabudhe, K.S., *et al.*, 1669
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740
Immunohistochemical detection and distribution of enamelysin (MMP-20) in human odontogenic tumors. Takata, T., *et al.*, 1608
Immunoquantification of human salivary mucins MG1 and MG2 in stimulated whole saliva: factors influencing mucin levels. Rayment, S.A., *et al.*, 1765
In vivo expression of the collagenolytic matrix metalloproteinases (MMP-2, -8, -13, and -14) and matrilysin (MMP-7) in adult and localized juvenile periodontitis, The. Tervahartiala, T., *et al.*, 1969
Influence of environmental pH on the reactivity of *Candida albicans* with salivary IgA. Bikandi, J., *et al.*, 1439
Inositol hexasulphate, a casein kinase inhibitor, alters enamel formation in cultured embryonic mouse tooth germs. Torres-Quintana, M.A., *et al.*, 1794
Interleukin-1α-dependent regulation of matrix metalloproteinase-9 (MMP-9) secretion and activation in the epithelial cells of odontogenic jaw cysts. Kubota, Y., *et al.*, 1423
Localization of EMSP1 expression during tooth formation and cloning of mouse cDNA. Hu, J.C.-C., *et al.*, 70
Molecular mapping of statherin- and histatin-binding domains in human salivary mucin MG1 (MUC5B) by the yeast two-hybrid system, 732
Prostaglandin E_2 enhances bradykinin-evoked iCGRP release in bovine dental pulp. Goodis, H.E., *et al.*, 1604
Role of MAP kinases $p42^{erk-2}/p44^{erk-1}$ in cementum-derived attachment-protein-mediated cell attachment. Komaki, M., *et al.*, 1789

BODY POSITION
Effects of head and body position on two- and three-dimensional configurations of the upper airway. Ono, T., *et al.*, 1879

BONDING, DENTAL (*see* Dental Bonding)

BONE DENSITY
Region-specific bone mass changes in rat mandibular condyle following ovariectomy. Tanaka, M., *et al.*, 1907
Relationship between the density of the alveolar

processes and that of post-cranial bone, The. Southard, K.A., *et al.*, 964

BONE FORMATION (*see* Osteogenesis)

BONE LOSS, PERIODONTAL (*see* Alveolar Bone Loss)

BONE MORPHOGENETIC PROTEINS
Inhibition of Wnt signaling by exogenous Mfrzb1 protein affects molar tooth size. Sarkar, L. and Sharpe, P.T., 920

BONE REMODELING
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675

BONE RESORPTION
Osteoprotegerin and osteoclast differentiation factor in tooth eruption. Wise, G.E., *et al.*, 1937
Quantification of periapical bone destruction in mice by micro-computed tomography. Balto, K., *et al.*, 35

BRADYKININ
Elevated intramuscular concentration of bradykinin in jaw muscle increases the fusimotor drive to neck muscles in the cat. Hellström, F., *et al.*, 1815
Prostaglandin E_2 enhances bradykinin-evoked iCGRP release in bovine dental pulp. Goodis, H.E., *et al.*, 1604

BREATHING
Effects of head and body position on two- and three-dimensional configurations of the upper airway. Ono, T., *et al.*, 1879

BRUXISM
No heritability of temporomandibular joint signs and symptoms. Michalowicz, B.S., *et al.*, 1573

BUFFERS
Adenoviral-mediated gene transfer to mouse salivary glands. Wang, S., *et al.*, 701

BUTYRIC ACIDS
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948

C-REACTIVE PROTEIN
Acute-phase inflammatory response to periodontal disease in the US population. Slade, G.D., *et al.*, 49

CALCIFICATION, PHYSIOLOGIC
Dose-dependent modulation of octacalcium phosphate crystal habit by amelogenins. Wen, H.B., *et al.*, 1902
Evidence for charge domains on developing enamel crystal surfaces. Kirkham, J., *et al.*, 1943
N-terminal sequence analysis of bovine dentin phosphophoryn after conversion of phosphoseryl to *S*-propylcysteinyl residues. Huq, N.L., *et al.*, 1914

CALCINOSIS
Electron microscopy, micro-analysis, and x-ray diffraction characterization of the mineral-like tissue deposited by human cementum tumor-derived cells. Arzate, H., *et al.*, 28

CALCITONIN
Mandibular bone formation rates in aged ovariectomized rats treated with anti-resorptive agents alone and in combination with intermittent parathyroid hormone. Hunziker, J., *et al.*, 1431

CALCITONIN GENE-RELATED PEPTIDE
Prostaglandin E_2 enhances bradykinin-evoked iCGRP release in bovine dental pulp. Goodis, H.E., *et al.*, 1604

CALCIUM
Immunohistochemical localization of Gαq, PLCβ, Gαi1-2, PKA, and the endothelin B and extracellular Ca^{2+}-sensing receptors during early amelogenesis. Moran, R.A., *et al.*, 1896

CALCIUM-BINDING PROTEINS
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740

CALCIUM PHOSPHATES
Composition of plaque and saliva following use of an α-tricalcium-phosphate-containing chewing gum and a subsequent sucrose challenge. Vogel, G.L., *et al.*, 58
Dose-dependent modulation of octacalcium phosphate crystal habit by amelogenins. Wen, H.B., *et al.*, 1902

CAMPYLOBACTER
Campylobacter species in health, gingivitis, and periodontitis. Macuch, P.J. and Tanner, A.C.R., 785

CANDIDA ALBICANS
Influence of environmental pH on the reactivity of *Candida albicans* with salivary IgA. Bikandi, J., *et al.*, 1439

CARBACHOL
Choline acetyltransferase, acetylcholinesterase, and nicotinic acetylcholine receptors of human gingival and esophageal epithelia. Thuong Nguyen, V., *et al.*, 939

CARBOHYDRATES (*see* Dietary Carbohydrates)

CARBON DIOXIDE
Effects of low-energy CO_2 laser irradiation and the organic matrix on inhibition of enamel demineralization. Hsu, C.-Y.S., *et al.*, 1725

CARDIOVASCULAR DISEASES
Acute-phase inflammatory response to periodontal disease in the US population. Slade, G.D., *et al.*, 49

CARIOSTATIC AGENTS
Composition of plaque and saliva following use of an α-tricalcium-phosphate-containing chewing gum and a subsequent sucrose challenge. Vogel, G.L., *et al.*, 58
Effect of *in vitro* acidification on plaque fluid composition with and without a NaF or a controlled-release fluoride rinse. Vogel, G.L., *et al.*, 983
Influence of maternal xylitol consumption on acquisition of mutans streptococci by infants, Söderling, E., *et al.*, 882
Occurrence of dental decay in children after maternal consumption of xylitol chewing gum, a follow-up from 0 to 5 years. Isokangas, P., *et al.*, 1885
Remineralization effects of a two-solution fluoride mouthrinse: an *in situ* study. Chow, L.C., *et al.*, 991
Rocky road of xylitol to its clinical application, The. Mäkinen, K.K., 1352

CASEIN KINASE
Inositol hexasulphate, a casein kinase inhibitor, alters enamel formation in cultured embryonic mouse tooth germs. Torres-Quintana, M.A., *et al.*, 1794

CASPASES
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948

CATHEPSINS
High glucose suppresses cathepsin activity in periodontal-ligament-derived fibroblastic cells. Nishimura, F., *et al.*, 1614

CATS
Effect of a cholecystokinin agonist on masseter muscle activity in the cat, The. Sitthisomwong, P., *et al.*, 1823
Elevated intramuscular concentration of bradykinin in jaw muscle increases the fusimotor drive to neck muscles in the cat. Hellström, F., *et al.*, 1815
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626

CATTLE
N-terminal sequence analysis of bovine dentin phosphophoryn after conversion of phosphoseryl to *S*-propylcysteinyl residues. Huq, N.L., *et al.*, 1914
Prostaglandin E_2 enhances bradykinin-evoked iCGRP release in bovine dental pulp. Goodis, H.E., *et al.*, 1604
Temperature dependence of the electrical resistance of sound and carious teeth. Huysmans, M.C.D.N.J.M., *et al.*, 1464

CAUCASOID RACE
Clinical and genetic analysis of a large north European Caucasian family affected by early-onset periodontitis. Hodge, P.J., *et al.*, 857

CD-4 POSITIVE T-LYMPHOCYTES
Cytokine profiles of T-lymphocytes from gingival tissues with pathological pocketing. Takeichi, O., *et al.*, 1548

CD-8 POSITIVE T-LYMPHOCYTES
Cytokine profiles of T-lymphocytes from gingival tissues with pathological pocketing. Takeichi, O., *et al.*, 1548

CELL ADHESION
Choline acetyltransferase, acetylcholinesterase, and nicotinic acetylcholine receptors of human gingival and esophageal epithelia. Thuong Nguyen, V., *et al.*, 939
High glucose suppresses cathepsin activity in periodontal-ligament-derived fibroblastic cells. Nishimura, F., *et al.*, 1614
Role of MAP kinases $p42^{erk-2}/p44^{erk-1}$ in cementum-derived attachment-protein-mediated cell attachment. Komaki, M., *et al.*, 1789

CELL ADHESION MOLECULES
Cyclooxygenase-2-dependent prostaglandin E_2 down-regulates intercellular adhesion molecule-1 expression *via* EP_2/EP_4 receptors in interleukin-1β-stimulated human gingival fibroblasts. Noguchi, K., *et al.*, 1955

CELL COMMUNICATION
Inhibition of Wnt signaling by exogenous Mfrzb1 protein affects molar tooth size. Sarkar, L. and Sharpe, P.T., 920

CELL CYCLE
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948

CELL DIFFERENTIATION
Delayed embryonic development of mouse masseter muscle correlates with delayed myoD family expression. Yamane, A., *et al.*, 1933
Odontoblast differentiation and tooth morphogenesis. Lesot, H., 1640
Osteoprotegerin and osteoclast differentiation factor in tooth eruption. Wise, G.E., *et al.*, 1937
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

CELL DIVISION
Effects of TGFβ1 on dental pulp cells in cultured human tooth slices. Melin, M., *et al.*, 1689
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

CELL MIGRATION INHIBITION
Effects of TGFβ1 on dental pulp cells in cultured human tooth slices. Melin, M., *et al.*, 1689

CELL MOVEMENT
Choline acetyltransferase, acetylcholinesterase, and nicotinic acetylcholine receptors of human gingival and esophageal epithelia. Thuong Nguyen, V., *et al.*, 939

CELLS, CULTURED
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675
Cytokine responses of oral epithelial cells to *Porphyromonas gingivalis* infection. Sandros, J., *et al.*, 1808
Development and characterization of a tissue-engineered human oral mucosa equivalent produced in a serum-free culture system. Izumi, K., *et al.*, 798
Effects of TGFβ1 on dental pulp cells in cultured human tooth slices. Melin, M., *et al.*, 1689
Induction of intracellular interleukin-1β signals *via* type II interleukin-1 receptor in human gingival fibroblasts. Chou, H.-H., *et al.*, 1683

CEMENTOBLASTS (*see* Dental Cementum)

CERAMICS
Crack initiation modes in bilayered alumina/porcelain disks as a function of core/veneer thickness ratio and supporting stiffness. Wakabayashi, N. and Anusavice, K.J., 1398
Effects of whisker-to-silica ratio on the reinforcement of dental resin composites with silica-fused whiskers. Xu, H.H.K., *et al.*, 1844
Lifetime-limiting strength degradation from contact fatigue in dental ceramics. Jung, Y.-G., *et al.*, 722
Whisker-reinforced heat-cured dental resin composites: effects of filler level and heat-cure temperature and time. Xu, H.H.K., 1392

CETYLPYRIDINIUM
Antibacterial activities and release kinetics of a newly developed recoverable controlled agent-release system. Ehara, A., *et al.*, 824

CHELATING AGENTS
Diagnostic value of a chelating agent in patients with symptoms allegedly caused by amalgam fillings. Vamnes, J.S., *et al.*, 868

CHEMICAL SHIFT IMAGING (*see* Nuclear Magnetic Resonance)

CHEMOTAXIS
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

CHEWING GUM
Composition of plaque and saliva following use of an α-tricalcium-phosphate-containing chewing gum and a subsequent sucrose challenge. Vogel, G.L., *et al.*, 58
Influence of maternal xylitol consumption on acquisition of mutans streptococci by infants, Söderling, E., *et al.*, 882
Occurrence of dental decay in children after maternal consumption of xylitol chewing gum, a follow-up from 0 to 5 years. Isokangas, P., *et al.*, 1885
Rocky road of xylitol to its clinical application, The. Mäkinen, K.K., 1352

CHEWING (*see* Mastication)

CHILD
Caries in five-year-old children and associations with family-related factors. Mattila, M.-L., *et al.*, 875
Effects of a break in water fluoridation on the development of dental caries and fluorosis, The. Burt, B.A., *et al.*, 761
Intra-oral distribution of dental fluorosis in Newburgh and Kingston, New York. Kumar, J., *et al.*, 1508
Occlusal contacts during lateral excursions in children with primary dentition. Okamoto, A., *et al.*, 1890
Occurrence of dental decay in children after maternal consumption of xylitol chewing gum, a follow-up from 0 to 5 years. Isokangas, P., *et al.*, 1885
Oral colonization with *Actinomyces* species in infants by two years of age. Sarkonen, N., *et al.*, 864
Time-dependent decrease and seasonal variation of the porosity of recently erupted sound dental enamel *in vivo*. ten Bosch, J.J., *et al.*, 1556
Water-insoluble glucan synthesis by mutans streptococcal strains correlates with caries incidence in 12- to 30-month-old children. Mattos-Graner, R.O., *et al.*, 1371

CHLORHEXIDINE
Influence of maternal xylitol consumption on acquisition of mutans streptococci by infants, Söderling, E., *et al.*, 882

CHOLECYSTOKININ
Effect of a cholecystokinin agonist on masseter muscle activity in the cat, The. Sitthisomwong, P., *et al.*, 1823

CHOLINE O-ACETYLTRANSFERASE
Choline acetyltransferase, acetylcholinesterase, and nicotinic acetylcholine receptors of human gingival and esophageal epithelia. Thuong Nguyen, V., *et al.*, 939

CHROMATOGRAPHY
N-terminal sequence analysis of bovine dentin phosphophoryn after conversion of phosphoseryl to *S*-propylcysteinyl residues. Huq, N.L., *et al.*, 1914

CHROMOSOME MAPPING
Cloning human enamelin cDNA, chromosomal localization, and analysis of expression during tooth development. Hu, C.-C., *et al.*, 912

CHROMOSOME SEGREGATION
Clinical and genetic analysis of a large north European Caucasian family affected by early-onset periodontitis. Hodge, P.J., *et al.*, 857

CHROMOSOMES, HUMAN, PAIR 2
Evidence of genetic heterogeneity for hereditary gingival fibromatosis. Hart, T.C., *et al.*, 1758

CHROMOSOMES, HUMAN, PAIR 4
Non-collagenous dentin matrix proteins are involved in dentinogenesis imperfecta type II (DGI-II), The. Thotakura, S.R., *et al.*, 835

CICATRIX
Local injection of IFN-gamma reduces the number of myofibroblasts and the collagen content in palatal wounds. Cornelissen, A.M.H., *et al.*, 1782

CLEFT PALATE
Local injection of IFN-gamma reduces the number of myofibroblasts and the collagen content in palatal wounds. Cornelissen, A.M.H., *et al.*, 1782

CLINICAL TRIALS
Are all clinical caries prevention studies biased? Alanen, P., 796

CLONE CELLS
Cementum attachment protein enriches putative cementoblastic populations on root surfaces *in vitro*. BarKana, I., *et al.*, 1482

CLONING, MOLECULAR
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Localization of EMSP1 expression during tooth formation and cloning of mouse cDNA. Hu, J.C.-C., *et al.*, 70

COGNITIVE THERAPY
Relaxation *vs.* cognitively oriented therapies for dental fear. Berggren, U., *et al.*, 1645

COLLAGEN
Collagen XII mutation disrupts matrix structure of periodontal ligament and skin. Reichenberger, E. , *et al.*, 1962
Effects of TGFβ1 on dental pulp cells in cultured human tooth slices. Melin, M., *et al.*, 1689
H^+-induced tension development in demineralized dentin matrix. Pashley, D.H., *et al.*, 1579
Local injection of IFN-gamma reduces the number of myofibroblasts and the collagen content in palatal wounds. Cornelissen, A.M.H., *et al.*, 1782
Role of MAP kinases $p42^{erk-2}/p44^{erk-1}$ in cementum-derived attachment-protein-mediated cell attachment. Komaki, M., *et al.*, 1789

COLLAGENASES
Collagenases in different categories of peri-implant vertical bone loss. Ma, J., *et al.*, 1870
Expression of MMP-8 in human odontoblasts and dental pulp cells is down-regulated by TGF-β1, The. Palosaari, H., *et al.*, 77
In vivo expression of the collagenolytic matrix metalloproteinases (MMP-2, -8, -13, and -14) and matrilysin (MMP-7) in adult and localized juvenile periodontitis, The. Tervahartiala, T., *et al.*, 1969

COLONY-STIMULATING FACTORS
Osteoprotegerin and osteoclast differentiation factor in tooth eruption. Wise, G.E., *et al.*, 1937

COMPARATIVE STUDY
Between-subject and within-subject statistical information in dental research. Mancl, L.A., *et al.*, 1778

COMPOSITES
Effects of adhesive thickness on polymerization contraction stress of composite, The. Choi, K.K., *et al.*, 812
Effects of whisker-to-silica ratio on the reinforcement of dental resin composites with silica-fused whiskers. Xu, H.H.K., *et al.*, 1844
In vivo degradation of resin-dentin bonds in humans over 1 to 3 years. Hashimoto, M., *et al.*, 1385
Nominal shear or fracture mechanics in the assessment of composite-dentin adhesion? Tantbirojn, D., *et al.*, 41
Visco-elastic parameters of dental restorative materials during setting. Dauvillier, B.S., *et al.*, 818
Whisker-reinforced heat-cured dental resin composites: effects of filler level and heat-cure temperature and time. Xu, H.H.K., 1392

COMPUTED TOMOGRAPHY (*see* Tomography, X-ray Computed)

COMPUTER SIMULATION
Design and wear testing of a temporomandibular joint prosthesis articulation. van Loon, J.-P., *et al.*, 715

CONDYLE, MANDIBULAR (*see* Mandibular Condyle)

CONTINGENT NEGATIVE VARIATION
Cortical potentials associated with voluntary mandibular movements. Yoshida, K., *et al.*, 1514

CONTRACTION
Effects of adhesive thickness on polymerization contraction stress of composite, The. Choi, K.K., *et al.*, 812
Visco-elastic parameters of dental restorative materials during setting. Dauvillier, B.S., *et al.*, 818

CONTROLLED-RELEASE PREPARATIONS (*see* Delayed-Action Preparations)

CORONARY DISEASE
Age, dental infections, and coronary heart disease. Mattila, K.J., *et al.*, 756

CORTEX (*see* Motor Cortex)

CORTICOSTERONE
Meal pattern analysis in response to temporomandibular joint inflammation in the rat. Harper, R.P., *et al.*, 1704

CRACKS (*see* Fractures)

CREUTZFELDT-JAKOB SYNDROME
Prion protein is not detectable in dental pulp from patients with Creutzfeldt-Jakob disease. Blanquet-Grossard, F., *et al.*, 700

CROSS-LINKING REAGENTS
Pellicle precursor protein crosslinking: characterization of an adduct between acidic proline-rich protein (PRP-1) and statherin generated by transglutaminase. Yao, Y., *et al.*, 930

CULTURE MEDIA, SERUM-FREE
Development and characterization of a tissue-engineered human oral mucosa equivalent produced in a serum-free culture system. Izumi, K., *et al.*, 798

CURING
Whisker-reinforced heat-cured dental resin composites: effects of filler level and heat-cure temperature and time. Xu, H.H.K., 1392

CYCLODEXTRINS
MALDI-TOF MS analysis of a library of polymerizable cyclodextrin derivatives. Bowen, R.L., *et al.*, 905

CYCLOOXYGENASE (*see* Prostaglandin-Endoperoxide Synthase)

CYSTS
Interleukin-1α-dependent regulation of matrix metalloproteinase-9 (MMP-9) secretion and activation in the epithelial cells of odontogenic jaw cysts. Kubota, Y., *et al.*, 1423
PTCH gene mutations in odontogenic keratocysts. Barreto, D.C., *et al.*, 1418

CYTOKINES
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675
Cytokine profiles of T-lymphocytes from gingival tissues with pathological pocketing. Takeichi, O., *et al.*, 1548
Cytokine responses of oral epithelial cells to *Porphyromonas gingivalis* infection. Sandros, J., *et al.*, 1808
Induction of intracellular interleukin-1β signals *via* type II interleukin-1 receptor in human gingival fibroblasts. Chou, H.-H., *et al.*, 1683

DECALCIFICATION TECHNIQUE
H^+-induced tension development in demineralized dentin matrix. Pashley, D.H., *et al.*, 1579

DECISION MAKING
Dentists' judgment strategies on prophylactic removal of mandibular third molars. Knutsson, K., *et al.*, 1989

DEFENSINS
Expression of the antimicrobial peptide, human β-defensin 1, in duct cells of minor salivary glands and detection in saliva. Sahasrabudhe, K.S., *et al.*, 1669

DEFOROXAMINE
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489

DELAYED-ACTION PREPARATIONS
Antibacterial activities and release kinetics of a newly developed recoverable controlled agent-release system. Ehara, A., *et al.*, 824
Effect of *in vitro* acidification on plaque fluid composition with and without a NaF or a controlled-release fluoride rinse. Vogel, G.L., *et al.*, 983
Local and chronic application of PTH accelerates tooth movement in rats. Soma, S., *et al.*, 1717

DEMOGRAPHY
Empirical test of the validity of the Oral Health Status Index (OHSI) on a minority population, An. Spolsky, V.W., *et al.*, 1983

DENTAL AMALGAM
Diagnostic value of a chelating agent in patients with symptoms allegedly caused by amalgam fillings. Vamnes, J.S., *et al.*, 868

DENTAL ANXIETY
Relaxation *vs.* cognitively oriented therapies for dental fear. Berggren, U., *et al.*, 1645

DENTAL BONDING
Bond strength of resin to acid-etched dentin studied by ^{13}C NMR: interaction between N-methacryloyl-ω-amino acid primer and dentinal collagen. Nishiyama, N., *et al.*, 806
Effects of adhesive thickness on polymerization contraction stress of composite, The. Choi, K.K., *et al.*, 812
Evidence of chemical bonding at biomaterial-hard tissue interfaces. Yoshida, Y., *et al.*, 709
Improved sealant retention with bonding agents: a clinical study of two-bottle and single-bottle systems. Feigal, R.J., *et al.*, 1850
In vivo degradation of resin-dentin bonds in humans over 1 to 3 years. Hashimoto, M., *et al.*, 1385
Interfacial chemistry of the dentin/adhesive bond. Spencer, P., *et al.*, 1458
MALDI-TOF MS analysis of a library of polymerizable cyclodextrin derivatives. Bowen, R.L., *et al.*, 905

DENTAL CALCULUS
Feasibility of computer-assisted recognition of different dental hard tissues. Kocher, T., *et al.*, 829

DENTAL CARE
Age, dental infections, and coronary heart disease. Mattila, K.J., *et al.*, 756
Use of dental care by HIV-infected medical patients. Coulter, I.D., *et al.*, 1356

DENTAL CARIES
Age, dental infections, and coronary heart disease. Mattila, K.J., *et al.*, 756
Are all clinical caries prevention studies biased? Alanen, P., 796
Association of basic proline-rich peptides from human parotid gland secretions with caries experience, The. Ayad, M., *et al.*, 976
Caries in five-year-old children and associations with family-related factors. Mattila, M.-L., *et al.*, 875
Effect of *in vitro* acidification on plaque fluid composition with and without a NaF or a controlled-release fluoride rinse. Vogel, G.L., *et al.*, 983
Effects of a break in water fluoridation on the development of dental caries and fluorosis, The. Burt, B.A., *et al.*, 761
Effects of low-energy CO_2 laser irradiation and the organic matrix on inhibition of enamel demineralization. Hsu, C.-Y.S., *et al.*, 1725
Occurrence of dental decay in children after maternal consumption of xylitol chewing gum, a follow-up from 0 to 5 years. Isokangas, P., *et al.*, 1885
Optical scattering power for characterization of mineral loss. Ko, C.C., *et al.*, 1584
pH of dental plaque in its relation to early enamel caries and dental plaque flora in humans, The. Lingström, P., *et al.*, 770
Real performance of bitewing radiography and fiber-optic transillumination in approximal caries diagnosis, The. Vaarkamp, J., *et al.*, 1747
Relationship among mutans streptococci, "low-pH" bacteria, and iodophilic polysaccharide-producing bacteria in dental plaque and early enamel caries in humans. van Ruyven, F.O.J., *et al.*, 778
Remineralization effects of a two-solution fluoride mouthrinse: an *in situ* study. Chow, L.C., *et al.*, 991
Rocky road of xylitol to its clinical application, The. Mäkinen, K.K., 1352
Temperature dependence of the electrical resistance of sound and carious teeth. Huysmans, M.C.D.N.J.M., *et al.*, 1464
Time-dependent decrease and seasonal variation of the porosity of recently erupted sound dental enamel *in vivo*. ten Bosch, J.J., *et al.*, 1556
Water-insoluble glucan synthesis by mutans streptococcal strains correlates with caries incidence in 12- to 30-month-old children. Mattos-Graner, R.O., *et al.*, 1371

DENTAL CEMENTUM
Cementum attachment protein enriches putative cementoblastic populations on root surfaces *in vitro*. BarKana, I., *et al.*, 1482
Electron microscopy, micro-analysis, and x-ray diffraction characterization of the mineral-like tissue deposited by human cementum tumor-derived cells. Arzate, H., *et al.*, 28
Feasibility of computer-assisted recognition of different dental hard tissues. Kocher, T., *et al.*, 829
Role of MAP kinases $p42^{erk-2}/p44^{erk-1}$ in cementum-derived attachment-protein-mediated cell attachment. Komaki, M., *et al.*, 1789

DENTAL CEMENTUM ATTACHMENT PROTEIN
Cementum attachment protein enriches putative cementoblastic populations on root surfaces *in vitro*. BarKana, I., *et al.*, 1482

DENTAL ENAMEL
Cloning human enamelin cDNA, chromosomal localization, and analysis of expression during tooth development. Hu, C.-C., *et al.*, 912
Dose-dependent modulation of octacalcium phosphate crystal habit by amelogenins. Wen, H.B., *et al.*, 1902
Effects of low-energy CO_2 laser irradiation and the organic matrix on inhibition of enamel demineralization. Hsu, C.-Y.S., *et al.*, 1725
Evidence for charge domains on developing enamel crystal surfaces. Kirkham, J., *et al.*, 1943
Evidence of chemical bonding at biomaterial-hard tissue interfaces. Yoshida, Y., *et al.*, 709
Feasibility of computer-assisted recognition of different dental hard tissues. Kocher, T., *et al.*, 829
Immunohistochemical localization of Gαq, PLCβ, Gαi1-2, PKA, and the endothelin B and extracellular Ca^{2+}-sensing receptors during early amelogenesis. Moran, R.A., *et al.*, 1896
Inositol hexasulphate, a casein kinase inhibitor, alters enamel formation in cultured embryonic mouse tooth germs. Torres-Quintana, M.A., *et al.*, 1794
Optical scattering power for characterization of mineral loss. Ko, C.C., *et al.*, 1584
Pellicle precursor protein crosslinking: characterization of an adduct between acidic proline-rich protein (PRP-1) and statherin generated by transglutaminase. Yao, Y., *et al.*, 930
pH of dental plaque in its relation to early enamel caries and dental plaque flora in humans, The. Lingström, P., *et al.*, 770
Relationship among mutans streptococci, "low-pH" bacteria, and iodophilic polysaccharide-producing bacteria in dental plaque and early enamel caries in humans. van Ruyven, F.O.J., *et al.*, 778
Remineralization effects of a two-solution fluoride mouthrinse: an *in situ* study. Chow, L.C., *et al.*, 991
Time-dependent decrease and seasonal variation

of the porosity of recently erupted sound dental enamel *in vivo*. ten Bosch, J.J., *et al.*, 1556
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

DENTAL ENAMEL PROTEINS
Detection of a novel mutation in X-linked amelogenesis imperfecta. Kindelan, S.A., *et al.*, 1978
Dose-dependent modulation of octacalcium phosphate crystal habit by amelogenins. Wen, H.B., *et al.*, 1902
Immunohistochemical detection and distribution of enamelysin (MMP-20) in human odontogenic tumors. Takata, T., *et al.*, 1608
Inositol hexasulphate, a casein kinase inhibitor, alters enamel formation in cultured embryonic mouse tooth germs. Torres-Quintana, M.A., *et al.*, 1794
Localization of EMSP1 expression during tooth formation and cloning of mouse cDNA. Hu, J.C.-C., *et al.*, 70
Mass spectrometry of native rat amelogenins: primary transcripts, secretory isoforms, and C-terminal degradation. Chen, W.-Y., *et al.*, 840
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

DENTAL FOLLICLE (*see* Dental Sac)

DENTAL HEALTH SURVEYS
Acute-phase inflammatory response to periodontal disease in the US population. Slade, G.D., *et al.*, 49
Caries in five-year-old children and associations with family-related factors. Mattila, M.-L., *et al.*, 875
Empirical test of the validity of the Oral Health Status Index (OHSI) on a minority population, An. Spolsky, V.W., *et al.*, 1983
Intra-oral distribution of dental fluorosis in Newburgh and Kingston, New York. Kumar, J., *et al.*, 1508
Measuring the effect of intra-oral implant rehabilitation on health-related quality of life in a randomized controlled clinical trial. Awad, M.A., *et al.*, 1659
Self-perceived oral health status, psychological well-being, and life satisfaction in an older adult population. Locker, D., *et al.*, 970
Use of dental care by HIV-infected medical patients. Coulter, I.D., *et al.*, 1356

DENTAL IMPLANTATION, ENDOSSEOUS
Biomechanical evaluation of osseous implants having different surface topographies in rats. Ogawa, T., *et al.*, 1857
Biting and chewing in overdentures, full dentures, and natural dentitions. Fontijn-Tekamp, F.A., *et al.*, 1519
Collagenases in different categories of peri-implant vertical bone loss. Ma, J., *et al.*, 1870
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675
From osseointegration to osseoperception. van Steenberghe, D., 1833
Measuring the effect of intra-oral implant rehabilitation on health-related quality of life in a randomized controlled clinical trial. Awad, M.A., *et al.*, 1659

DENTAL LEAKAGE
Effects of adhesive thickness on polymerization contraction stress of composite, The. Choi, K.K., *et al.*, 812

DENTAL OCCLUSION
Occlusal contacts during lateral excursions in children with primary dentition. Okamoto, A., *et al.*, 1890
Region-specific bone mass changes in rat mandibular condyle following ovariectomy. Tanaka, M., *et al.*, 1907

DENTAL PLAQUE
Architecture of intact natural human plaque biofilms studied by confocal laser scanning microscopy. Wood, S.R., *et al.*, 21
Composition of plaque and saliva following use of an α-tricalcium-phosphate-containing chewing gum and a subsequent sucrose challenge. Vogel, G.L., *et al.*, 58
Effect of *in vitro* acidification on plaque fluid composition with and without a NaF or a controlled-release fluoride rinse. Vogel, G.L., *et al.*, 983
pH of dental plaque in its relation to early enamel caries and dental plaque flora in humans, The. Lingström, P., *et al.*, 770
Relationship among mutans streptococci, "low-pH" bacteria, and iodophilic polysaccharide-producing bacteria in dental plaque and early enamel caries in humans. van Ruyven, F.O.J., *et al.*, 778
Water-insoluble glucan synthesis by mutans streptococcal strains correlates with caries incidence in 12- to 30-month-old children. Mattos-Graner, R.O., *et al.*, 1371

DENTAL PORCELAIN
Crack initiation modes in bilayered alumina/porcelain disks as a function of core/veneer thickness ratio and supporting stiffness. Wakabayashi, N. and Anusavice, K.J., 1398
High-temperature x-ray diffraction measurement of sanidine thermal expansion. Mackert, J.R., Jr., *et al.*, 1590

DENTAL PROSTHESIS, IMPLANT-SUPPORTED
Biting and chewing in overdentures, full dentures, and natural dentitions. Fontijn-Tekamp, F.A., *et al.*, 1519
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675
From osseointegration to osseoperception. van Steenberghe, D.,1833
Measuring the effect of intra-oral implant rehabilitation on health-related quality of life in a randomized controlled clinical trial. Awad, M.A., *et al.*, 1659

DENTAL PULP
Effects of TGFβ1 on dental pulp cells in cultured human tooth slices. Melin, M., *et al.*, 1689
Expression of MMP-8 in human odontoblasts and dental pulp cells is down-regulated by TGF-β1, The. Palosaari, H., *et al.*, 77
Prion protein is not detectable in dental pulp from patients with Creutzfeldt-Jakob disease. Blanquet-Grossard, F., *et al.*, 700
Prostaglandin E_2 enhances bradykinin-evoked iCGRP release in bovine dental pulp. Goodis, H.E., *et al.*, 1604
Prostaglandin E_2 predominantly induces production of hepatocyte growth factor/scatter factor in human dental pulp in acute inflammation. Ohnishi, T., *et al.*, 748
Quantification of periapical bone destruction in mice by micro-computed tomography. Balto, K., *et al.*, 35
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

DENTAL RESTORATION WEAR
Lifetime-limiting strength degradation from contact fatigue in dental ceramics. Jung, Y.-G., *et al.*, 722

DENTAL SAC
Osteoprotegerin and osteoclast differentiation factor in tooth eruption. Wise, G.E., *et al.*, 1937

DENTAL SCALING
Feasibility of computer-assisted recognition of different dental hard tissues. Kocher, T., *et al.*, 829

DENTAL STRESS ANALYSIS (*see* Stress, Mechanical)

DENTIN
Bond strength of resin to acid-etched dentin studied by ^{13}C NMR: interaction between N-methacryloyl-ω-amino acid primer and dentinal collagen. Nishiyama, N., *et al.*, 806
H^+-induced tension development in demineralized dentin matrix. Pashley, D.H., *et al.*, 1579
N-terminal sequence analysis of bovine dentin phosphophoryn after conversion of phosphoseryl to *S*-propylcysteinyl residues. Huq, N.L., *et al.*, 1914

DENTIN-BONDING AGENTS
Improved sealant retention with bonding agents: a clinical study of two-bottle and single-bottle systems. Feigal, R.J., *et al.*, 1850
In vivo degradation of resin-dentin bonds in humans over 1 to 3 years. Hashimoto, M., *et al.*, 1385
Interfacial chemistry of the dentin/adhesive bond. Spencer, P., *et al.*, 1458
Nominal shear or fracture mechanics in the assessment of composite-dentin adhesion? Tantbirojn, D., *et al.*, 41

DENTINOGENESIS IMPERFECTA
Non-collagenous dentin matrix proteins are involved in dentinogenesis imperfecta type II (DGI-II), The. Thotakura, S.R., *et al.*, 835

DENTISTRY
Her name is "Lucy," our three-million-year-old ancestor. Shields, E.D., 13
Road to preventive dentistry—the personal scientific experience of a Japanese dentist, The. Koga, T., 7

DENTISTS
Dentists' judgment strategies on prophylactic removal of mandibular third molars. Knutsson, K., *et al.*, 1989

DENTITION, PERMANENT
Time-dependent decrease and seasonal variation of the porosity of recently erupted sound dental enamel *in vivo*. ten Bosch, J.J., *et al.*, 1556

DENTITION, PRIMARY
Controlled study of the morphometric changes in the primary dentition of pre-term, very-low-birthweight children, A. Seow, W.K. and Wan, A., 63
Occlusal contacts during lateral excursions in children with primary dentition. Okamoto, A., *et al.*, 1890

DENTURE, COMPLETE
Measuring the effect of intra-oral implant rehabilitation on health-related quality of life in a randomized controlled clinical trial. Awad, M.A., *et al.*, 1659

DENTURE, OVERLAY
Biting and chewing in overdentures, full dentures, and natural dentitions. Fontijn-Tekamp, F.A., *et al.*, 1519
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675

DENTURES
Biting and chewing in overdentures, full dentures, and natural dentitions. Fontijn-Tekamp, F.A., *et al.*, 1519

DEPRESSION
Low unstimulated salivary flow and subjective oral dryness: association with medication, anxiety, depression, and stress. Bergdahl, M. and Bergdahl, J., 1652

DEVELOPING COUNTRIES
International collaborative research on fluoride. Cohen, L., *et al.*, 893

DEXAMETHASONE
Adenoviral-mediated gene transfer to mouse sali-

vary glands. Wang, S., *et al.*, 701

DIABETES MELLITUS
High glucose suppresses cathepsin activity in periodontal-ligament-derived fibroblastic cells. Nishimura, F., *et al.*, 1614

DIAGNOSIS, COMPUTER-ASSISTED
Feasibility of computer-assisted recognition of different dental hard tissues. Kocher, T., *et al.*, 829

DIET, CARIOGENIC
Caries in five-year-old children and associations with family-related factors. Mattila, M.-L., *et al.*, 875

DIETARY CARBOHYDRATES
pH of dental plaque in its relation to early enamel caries and dental plaque flora in humans, The. Lingström, P., *et al.*, 770

DIETARY SUCROSE
pH of dental plaque in its relation to early enamel caries and dental plaque flora in humans, The. Lingström, P., *et al.*, 770

DIMERCUPROL (*see* Unithiol)

DINOPROSTONE
Cyclooxygenase-2-dependent prostaglandin E_2 down-regulates intercellular adhesion molecule-1 expression *via* EP_2/EP_4 receptors in interleukin-1β-stimulated human gingival fibroblasts. Noguchi, K., *et al.*, 1955
Prostaglandin E_2 enhances bradykinin-evoked iCGRP release in bovine dental pulp. Goodis, H.E., *et al.*, 1604
Prostaglandin E_2 predominantly induces production of hepatocyte growth factor/scatter factor in human dental pulp in acute inflammation. Ohnishi, T., *et al.*, 748

DIPHOSPHONATES
Mandibular bone formation rates in aged ovariectomized rats treated with anti-resorptive agents alone and in combination with intermittent parathyroid hormone. Hunziker, J., *et al.*, 1431

DISEASE TRANSMISSION
Prion protein is not detectable in dental pulp from patients with Creutzfeldt-Jakob disease. Blanquet-Grossard, F., *et al.*, 700

DISEASE TRANSMISSION, VERTICAL
Influence of maternal xylitol consumption on acquisition of mutans streptococci by infants, Söderling, E., *et al.*, 882

DMF INDEX
Caries in five-year-old children and associations with family-related factors. Mattila, M.-L., *et al.*, 875
Effects of a break in water fluoridation on the development of dental caries and fluorosis, The. Burt, B.A., *et al.*, 761
Empirical test of the validity of the Oral Health Status Index (OHSI) on a minority population, An. Spolsky, V.W., *et al.*, 1983

DNA
Local injection of IFN-gamma reduces the number of myofibroblasts and the collagen content in palatal wounds. Cornelissen, A.M.H., *et al.*, 1782

DNA, COMPLEMENTARY
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Cloning human enamelin cDNA, chromosomal localization, and analysis of expression during tooth development. Hu, C.-C., *et al.*, 912
Localization of EMSP1 expression during tooth formation and cloning of mouse cDNA. Hu, J.C.-C., *et al.*, 70

DNA, VIRAL
Proviral HIV-1 DNA in gingival crevicular fluid of HIV-1-infected patients in various stages of HIV disease. Maticic, M., *et al.*, 1496

DNA FRAGMENTATION
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948

DNA TRANSCRIPTION FACTORS
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

DROSOPHILA
Inhibition of Wnt signaling by exogenous Mfrzb1 protein affects molar tooth size. Sarkar, L. and Sharpe, P.T., 920
PTCH gene mutations in odontogenic keratocysts. Barreto, D.C., *et al.*, 1418

DRUGS (*see* Pharmaceutical Preparations)

DURAPATITE
Electron microscopy, micro-analysis, and x-ray diffraction characterization of the mineral-like tissue deposited by human cementum tumor-derived cells. Arzate, H., *et al.*, 28
Evidence for charge domains on developing enamel crystal surfaces. Kirkham, J., *et al.*, 1943
Evidence of chemical bonding at biomaterial-hard tissue interfaces. Yoshida, Y., *et al.*, 709
Interactions of human neutrophils with the constituents of an experimental dental biofilm, The. Shapira, L., *et al.*, 1802

EDUCATION, DENTAL
Forty-four years of dental research: role of education, teachers, research, and teaching. Hausmann, E., 1546
Philadelphia story, A—featuring Ned Williams: microbiology at the University of Pennsylvania School of Dental Medicine. Rosan, B. and Hammond, B.F., 1451

ELASTICITY
H^+-induced tension development in demineralized dentin matrix. Pashley, D.H., *et al.*, 1579
Visco-elastic parameters of dental restorative materials during setting. Dauvillier, B.S., *et al.*, 818

ELDERLY (*see* Aged)

ELECTRIC CONDUCTIVITY
Time-dependent decrease and seasonal variation of the porosity of recently erupted sound dental enamel *in vivo*. ten Bosch, J.J., *et al.*, 1556

ELECTRIC IMPEDANCE
Temperature dependence of the electrical resistance of sound and carious teeth. Huysmans, M.C.D.N.J.M., *et al.*, 1464

ELECTRIC STIMULATION
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626

ELECTROENCEPHALOGRAPHY
Cortical potentials associated with voluntary mandibular movements. Yoshida, K., *et al.*, 1514

ELECTROMYOGRAPHY
Cortical potentials associated with voluntary mandibular movements. Yoshida, K., *et al.*, 1514
Effect of a cholecystokinin agonist on masseter muscle activity in the cat, The. Sitthisomwong, P., *et al.*, 1823
EMG power spectrum and motor unit characteristics in the masseter muscle of the rabbit. Turkawski, S.J.J. and van Eijden, T.M.G.J., 950
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626

ELECTRON PROBE MICROANALYSIS
Evidence of chemical bonding at biomaterial-hard tissue interfaces. Yoshida, Y., *et al.*, 709

ELECTRON SPIN RESONANCE SPECTROSCOPY
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489

ELECTROPHORESIS, GEL, TWO-DIMENSIONAL
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740

ELECTROPHORESIS, POLYACRYLAMIDE GEL
Antibodies against mycobacterial antigens in the synovial fluid of patients with temporomandibular disorders. Adachi, N., *et al.*, 1752
Campylobacter species in health, gingivitis, and periodontitis. Macuch, P.J. and Tanner, A.C.R., 785
Inositol hexasulphate, a casein kinase inhibitor, alters enamel formation in cultured embryonic mouse tooth germs. Torres-Quintana, M.A., *et al.*, 1794
Interleukin-1α-dependent regulation of matrix metalloproteinase-9 (MMP-9) secretion and activation in the epithelial cells of odontogenic jaw cysts. Kubota, Y., *et al.*, 1423
Mass spectrometry of native rat amelogenins: primary transcripts, secretory isoforms, and C-terminal degradation. Chen, W.-Y., *et al.*, 840
Molecular mapping of statherin- and histatin-binding domains in human salivary mucin MG1 (MUC5B) by the yeast two-hybrid system, 732
N-terminal sequence analysis of bovine dentin phosphophoryn after conversion of phosphoseryl to *S*-propylcysteinyl residues. Huq, N.L., *et al.*, 1914
Water-insoluble glucan synthesis by mutans streptococcal strains correlates with caries incidence in 12- to 30-month-old children. Mattos-Graner, R.O., *et al.*, 1371

ELECTROPHYSIOLOGY
Evidence for charge domains on developing enamel crystal surfaces. Kirkham, J., *et al.*, 1943

EMOTIONS
Effect of a cholecystokinin agonist on masseter muscle activity in the cat, The. Sitthisomwong, P., *et al.*, 1823

ENAMEL ORGAN
Immunohistochemical localization of Gαq, PLCβ, Gαi1-2, PKA, and the endothelin B and extracellular Ca^{2+}-sensing receptors during early amelogenesis. Moran, R.A., *et al.*, 1896

ENAMEL (*see* Dental Enamel)

ENAMELYSIN (*see* Dental Enamel Proteins)

ENDOTHELIAL GROWTH FACTOR
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

ENDOTHELINS
Immunohistochemical localization of Gαq, PLCβ, Gαi1-2, PKA, and the endothelin B and extracellular Ca^{2+}-sensing receptors during early amelogenesis. Moran, R.A., *et al.*, 1896

ENZYME-LINKED IMMUNOABSORBENT ASSAY
Antibodies against mycobacterial antigens in the

synovial fluid of patients with temporomandibular disorders. Adachi, N., *et al.*, 1752
Immunoquantification of human salivary mucins MG1 and MG2 in stimulated whole saliva: factors influencing mucin levels. Rayment, S.A., *et al.*, 1765

EPIDEMIOLOGY
Empirical test of the validity of the Oral Health Status Index (OHSI) on a minority population, An. Spolsky, V.W., *et al.*, 1983

EPITHELIAL CELLS
AgNOR are sensitive markers of radiation lesions in squamous epithelia. Ielmini, M.V., *et al.*, 850
Choline acetyltransferase, acetylcholinesterase, and nicotinic acetylcholine receptors of human gingival and esophageal epithelia. Thuong Nguyen, V., *et al.*, 939
Cytokine responses of oral epithelial cells to *Porphyromonas gingivalis* infection. Sandros, J., *et al.*, 1808
Interleukin-1α-dependent regulation of matrix metalloproteinase-9 (MMP-9) secretion and activation in the epithelial cells of odontogenic jaw cysts. Kubota, Y., *et al.*, 1423

ESOPHAGUS
Choline acetyltransferase, acetylcholinesterase, and nicotinic acetylcholine receptors of human gingival and esophageal epithelia. Thuong Nguyen, V., *et al.*, 939

ESTROGENS
Estrogenicity of fissure sealants and adhesive resins determined by reporter gene assay. Tarumi, H., *et al.*, 1838
Mandibular bone formation rates in aged ovariectomized rats treated with anti-resorptive agents alone and in combination with intermittent parathyroid hormone. Hunziker, J., *et al.*, 1431
Region-specific bone mass changes in rat mandibular condyle following ovariectomy. Tanaka, M., *et al.*, 1907

EVOKED POTENTIALS
Cortical potentials associated with voluntary mandibular movements. Yoshida, K., *et al.*, 1514
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626

EVOLUTION
Her name is "Lucy," our three-million-year-old ancestor. Shields, E.D., 13

EXTRACELLULAR MATRIX
Collagen XII mutation disrupts matrix structure of periodontal ligament and skin. Reichenberger, E. , *et al.*, 1962
Effects of low-energy CO_2 laser irradiation and the organic matrix on inhibition of enamel demineralization. Hsu, C.-Y.S., *et al.*, 1725
Effects of TGFβ1 on dental pulp cells in cultured human tooth slices. Melin, M., *et al.*, 1689
High glucose suppresses cathepsin activity in periodontal-ligament-derived fibroblastic cells. Nishimura, F., *et al.*, 1614
Odontoblast differentiation and tooth morphogenesis. Lesot, H., 1640

EXTRACELLULAR MATRIX PROTEINS
Evidence for charge domains on developing enamel crystal surfaces. Kirkham, J., *et al.*, 1943
Mass spectrometry of native rat amelogenins: primary transcripts, secretory isoforms, and C-terminal degradation. Chen, W.-Y., *et al.*, 840
Non-collagenous dentin matrix proteins are involved in dentinogenesis imperfecta type II (DGI-II), The. Thotakura, S.R., *et al.*, 835
Role of MAP kinases $p42^{erk-2}/p44^{erk-1}$ in cementum-derived attachment-protein-mediated cell attachment. Komaki, M., *et al.*, 1789

FAILURE OF DENTAL MATERIALS
Crack initiation modes in bilayered alumina/porcelain disks as a function of core/veneer thickness ratio and supporting stiffness. Wakabayashi, N. and Anusavice, K.J., 1398
Lifetime-limiting strength degradation from contact fatigue in dental ceramics. Jung, Y.-G., *et al.*, 722
Nominal shear or fracture mechanics in the assessment of composite-dentin adhesion? Tantbirojn, D., *et al.*, 41

FAMILY HEALTH
Caries in five-year-old children and associations with family-related factors. Mattila, M.-L., *et al.*, 875

FAMILY TREE (*see* Pedigree)

FATIGUE (*see* Stress, Mechanical)

FATTY ACIDS
Development and characterization of a tissue-engineered human oral mucosa equivalent produced in a serum-free culture system. Izumi, K., *et al.*, 798

FEEDING BEHAVIOR
Meal pattern analysis in response to temporomandibular joint inflammation in the rat. Harper, R.P., *et al.*, 1704

FETAL DEVELOPMENT
Delayed embryonic development of mouse masseter muscle correlates with delayed myoD family expression. Yamane, A., *et al.*, 1933

FIBER OPTICS
Real performance of bitewing radiography and fiber-optic transillumination in approximal caries diagnosis, The. Vaarkamp, J., *et al.*, 1747

FIBROBLASTS
Cyclooxygenase-2-dependent prostaglandin E_2 down-regulates intercellular adhesion molecule-1 expression *via* EP_2/EP_4 receptors in interleukin-1β-stimulated human gingival fibroblasts. Noguchi, K., *et al.*, 1955
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675
Expression of MMP-8 in human odontoblasts and dental pulp cells is down-regulated by TGF-β1, The. Palosaari, H., *et al.*, 77
Expression of mRNAs encoding for α and β integrin subunits, MMPs, and TIMPs in stretched human periodontal ligament and gingival fibroblasts. Bolcato-Bellemin, A.L., *et al.*, 1712
High glucose suppresses cathepsin activity in periodontal-ligament-derived fibroblastic cells. Nishimura, F., *et al.*, 1614
In vivo expression of the collagenolytic matrix metalloproteinases (MMP-2, -8, -13, and -14) and matrilysin (MMP-7) in adult and localized juvenile periodontitis, The. Tervahartiala, T., *et al.*, 1969
Induction of intracellular interleukin-1β signals *via* type II interleukin-1 receptor in human gingival fibroblasts. Chou, H.-H., *et al.*, 1683
Local injection of IFN-gamma reduces the number of myofibroblasts and the collagen content in palatal wounds. Cornelissen, A.M.H., *et al.*, 1782
Prostaglandin E_2 predominantly induces production of hepatocyte growth factor/scatter factor in human dental pulp in acute inflammation. Ohnishi, T., *et al.*, 748
Role of MAP kinases $p42^{erk-2}/p44^{erk-1}$ in cementum-derived attachment-protein-mediated cell attachment. Komaki, M., *et al.*, 1789

FIBROMATOSIS, GINGIVAL
Evidence of genetic heterogeneity for hereditary gingival fibromatosis. Hart, T.C., *et al.*, 1758

FIMBRIAE, BACTERIAL
Prevalence of specific genotypes of *Porphyromonas gingivalis fimA* and periodontal health status. Amano, A., *et al.*, 1664

FINITE ELEMENT ANALYSIS
Crack initiation modes in bilayered alumina/porcelain disks as a function of core/veneer thickness ratio and supporting stiffness. Wakabayashi, N. and Anusavice, K.J., 1398

FISSURE SEALANTS (*see* Pit and Fissure Sealants)

FLOW CYTOMETRY
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

FLUORESCENT ANTIBODY TECHNIQUE, INDIRECT
Influence of environmental pH on the reactivity of *Candida albicans* with salivary IgA. Bikandi, J., *et al.*, 1439

FLUORIDATION
Effects of a break in water fluoridation on the development of dental caries and fluorosis, The. Burt, B.A., *et al.*, 761

FLUORIDES
Effect of *in vitro* acidification on plaque fluid composition with and without a NaF or a controlled-release fluoride rinse. Vogel, G.L., *et al.*, 983
Influence of maternal xylitol consumption on acquisition of mutans streptococci by infants, Söderling, E., *et al.*, 882
International collaborative research on fluoride. Cohen, L., *et al.*, 893
Intra-oral distribution of dental fluorosis in Newburgh and Kingston, New York. Kumar, J., *et al.*, 1508
Remineralization effects of a two-solution fluoride mouthrinse: an *in situ* study. Chow, L.C., *et al.*, 991

FLUOROIMMUNOASSAY
Collagenases in different categories of peri-implant vertical bone loss. Ma, J., *et al.*, 1870
Expression of MMP-8 in human odontoblasts and dental pulp cells is down-regulated by TGF-β1, The. Palosaari, H., *et al.*, 77

FLUOROSIS, DENTAL
Effects of a break in water fluoridation on the development of dental caries and fluorosis, The. Burt, B.A., *et al.*, 761
Intra-oral distribution of dental fluorosis in Newburgh and Kingston, New York. Kumar, J., *et al.*, 1508

FOOD
Effect of food size on the movement of the mandibular first molars and condyles during deliberate unilateral mastication in humans. Miyawaki, S., *et al.*, 1525

FORMIC ACIDS
Effects of organic acid anions on growth, glycolysis, and intracellular pH of oral streptococci. Dashper, S.G. and Reynolds, E.C., 90

FRACTURES
Crack initiation modes in bilayered alumina/porcelain disks as a function of core/veneer thickness ratio and supporting stiffness. Wakabayashi, N. and Anusavice, K.J., 1398
Lifetime-limiting strength degradation from contact fatigue in dental ceramics. Jung, Y.-G., *et al.*, 722
Nominal shear or fracture mechanics in the assessment of composite-dentin adhesion? Tantbirojn, D., *et al.*, 41
Whisker-reinforced heat-cured dental resin composites: effects of filler level and heat-cure

temperature and time. Xu, H.H.K., 1392

FRAMESHIFT MUTATION
Clinical, radiographic, and genetic evaluation of a novel form of autosomal-dominant oligodontia. Goldenberg, M., *et al.*, 1469
Detection of a novel mutation in X-linked amelogenesis imperfecta. Kindelan, S.A., *et al.*, 1978

FREE RADICAL SCAVENGERS
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489

FREUND'S ADJUVANT
Meal pattern analysis in response to temporomandibular joint inflammation in the rat. Harper, R.P., *et al.*, 1704

FUSIMOTOR NEURONS (*see* Motor Neurons, Gamma)

FUZZY LOGIC
Feasibility of computer-assisted recognition of different dental hard tissues. Kocher, T., *et al.*, 829

GENE EXPRESSION
Cloning human enamelin cDNA, chromosomal localization, and analysis of expression during tooth development. Hu, C.-C., *et al.*, 912
Cyclooxygenase-2-dependent prostaglandin E_2 down-regulates intercellular adhesion molecule-1 expression *via* EP_2/EP_4 receptors in interleukin-1β-stimulated human gingival fibroblasts. Noguchi, K., *et al.*, 1955
Expression of the antimicrobial peptide, human β-defensin 1, in duct cells of minor salivary glands and detection in saliva. Sahasrabudhe, K.S., *et al.*, 1669
Induction of intracellular interleukin-1β signals *via* type II interleukin-1 receptor in human gingival fibroblasts. Chou, H.-H., *et al.*, 1683
Low levels of GRP-Ca expression in transgenic mice. Ten Hagen, K.G. and Balys, M.M., 926

GENE EXPRESSION REGULATION
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Delayed embryonic development of mouse masseter muscle correlates with delayed myoD family expression. Yamane, A., *et al.*, 1933
Immunohistochemical localization of Gαq, PLCβ, Gαi1-2, PKA, and the endothelin B and extracellular Ca^{2+}-sensing receptors during early amelogenesis. Moran, R.A., *et al.*, 1896
Immunolocalization and adenoviral vector-mediated manganese superoxide-dismutase gene transfer to experimental oral tumors. Lam, E.W.N., *et al.*, 1410
Inhibition of Wnt signaling by exogenous Mfrzb1 protein affects molar tooth size. Sarkar, L. and Sharpe, P.T., 920
Localization of EMSP1 expression during tooth formation and cloning of mouse cDNA. Hu, J.C.-C., *et al.*, 70
Osteoprotegerin and osteoclast differentiation factor in tooth eruption. Wise, G.E., *et al.*, 1937
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

GENE TRANSFER
Adenoviral-mediated gene transfer to mouse salivary glands. Wang, S., *et al.*, 701
Immunolocalization and adenoviral vector-mediated manganese superoxide-dismutase gene transfer to experimental oral tumors. Lam, E.W.N., *et al.*, 1410

GENES, AMELX
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

GENES, BCL-2
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948

GENES, ENAMELIN
Cloning human enamelin cDNA, chromosomal localization, and analysis of expression during tooth development. Hu, C.-C., *et al.*, 912

GENES, HOMEOBOX
Clinical, radiographic, and genetic evaluation of a novel form of autosomal-dominant oligodontia. Goldenberg, M., *et al.*, 1469

GENES, MSX1
Clinical, radiographic, and genetic evaluation of a novel form of autosomal-dominant oligodontia. Goldenberg, M., *et al.*, 1469

GENES, P53
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948

GENES, PTCH
PTCH gene mutations in odontogenic keratocysts. Barreto, D.C., *et al.*, 1418

GENES, REPORTER
Estrogenicity of fissure sealants and adhesive resins determined by reporter gene assay. Tarumi, H., *et al.*, 1838

GENES, SUPPRESSOR, TUMOR
Immunolocalization and adenoviral vector-mediated manganese superoxide-dismutase gene transfer to experimental oral tumors. Lam, E.W.N., *et al.*, 1410
PTCH gene mutations in odontogenic keratocysts. Barreto, D.C., *et al.*, 1418

GENETIC HETEROGENEITY
Evidence of genetic heterogeneity for hereditary gingival fibromatosis. Hart, T.C., *et al.*, 1758

GENETIC PREDISPOSITION TO DISEASE
Clinical and genetic analysis of a large north European Caucasian family affected by early-onset periodontitis. Hodge, P.J., *et al.*, 857

GENETIC VECTORS
Adenoviral-mediated gene transfer to mouse salivary glands. Wang, S., *et al.*, 701
Immunolocalization and adenoviral vector-mediated manganese superoxide-dismutase gene transfer to experimental oral tumors. Lam, E.W.N., *et al.*, 1410

GENETICS, MEDICAL
No heritability of temporomandibular joint signs and symptoms. Michalowicz, B.S., *et al.*, 1573

GENOTYPE
Polymorphisms in the IL-1A gene are correlated with levels of interleukin-1α protein in gingival crevicular fluid of teeth with severe periodontal disease. Shirodaria, S., *et al.*, 1864
Prevalence of specific genotypes of *Porphyromonas gingivalis fimA* and periodontal health status. Amano, A., *et al.*, 1664

GINGIVA
Choline acetyltransferase, acetylcholinesterase, and nicotinic acetylcholine receptors of human gingival and esophageal epithelia. Thuong Nguyen, V., *et al.*, 939
Cyclooxygenase-2-dependent prostaglandin E_2 down-regulates intercellular adhesion molecule-1 expression *via* EP_2/EP_4 receptors in interleukin-1β-stimulated human gingival fibroblasts. Noguchi, K., *et al.*, 1955
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675
Cytokine profiles of T-lymphocytes from gingival tissues with pathological pocketing. Takeichi, O., *et al.*, 1548
Expression of mRNAs encoding for α and β integrin subunits, MMPs, and TIMPs in stretched human periodontal ligament and gingival fibroblasts. Bolcato-Bellemin, A.L., *et al.*, 1712
In vivo expression of the collagenolytic matrix metalloproteinases (MMP-2, -8, -13, and -14) and matrilysin (MMP-7) in adult and localized juvenile periodontitis, The. Tervahartiala, T., *et al.*, 1969
Induction of intracellular interleukin-1β signals *via* type II interleukin-1 receptor in human gingival fibroblasts. Chou, H.-H., *et al.*, 1683
Role of MAP kinases $p42^{erk-2}/p44^{erk-1}$ in cementum-derived attachment-protein-mediated cell attachment. Komaki, M., *et al.*, 1789

GINGIVAL CREVICULAR FLUID
Antigenic specificity of gingival crevicular fluid antibody to *Actinobacillus actinomycetemcomitans*. Ebersole, J.L., *et al.*, 1362
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740
In vivo expression of the collagenolytic matrix metalloproteinases (MMP-2, -8, -13, and -14) and matrilysin (MMP-7) in adult and localized juvenile periodontitis, The. Tervahartiala, T., *et al.*, 1969
Polymorphisms in the IL-1A gene are correlated with levels of interleukin-1α protein in gingival crevicular fluid of teeth with severe periodontal disease. Shirodaria, S., *et al.*, 1864
Proviral HIV-1 DNA in gingival crevicular fluid of HIV-1-infected patients in various stages of HIV disease. Maticic, M., *et al.*, 1496

GINGIVAL DISEASES
Evidence of genetic heterogeneity for hereditary gingival fibromatosis. Hart, T.C., *et al.*, 1758

GINGIVAL INDEX
Collagenases in different categories of periimplant vertical bone loss. Ma, J., *et al.*, 1870

GINGIVITIS
Campylobacter species in health, gingivitis, and periodontitis. Macuch, P.J. and Tanner, A.C.R., 785

GLASS
Lifetime-limiting strength degradation from contact fatigue in dental ceramics. Jung, Y.-G., *et al.*, 722

GLASS-IONOMER CEMENTS
Evidence of chemical bonding at biomaterial-hard tissue interfaces. Yoshida, Y., *et al.*, 709
Visco-elastic parameters of dental restorative materials during setting. Dauvillier, B.S., *et al.*, 818

GLUCANS
Water-insoluble glucan synthesis by mutans streptococcal strains correlates with caries incidence in 12- to 30-month-old children. Mattos-Graner, R.O., *et al.*, 1371

GLUCOSE
High glucose suppresses cathepsin activity in periodontal-ligament-derived fibroblastic cells. Nishimura, F., *et al.*, 1614

GLUCOSYLTRANSFERASE
Water-insoluble glucan synthesis by mutans streptococcal strains correlates with caries incidence in 12- to 30-month-old children. Mattos-Graner, R.O., *et al.*, 1371

GLUTAMIC ACID
Low levels of GRP-Ca expression in transgenic mice. Ten Hagen, K.G. and Balys, M.M., 926

GLUTAMINE
Low levels of GRP-Ca expression in transgenic mice. Ten Hagen, K.G. and Balys, M.M., 926
Pellicle precursor protein crosslinking: characterization of an adduct between acidic proline-rich protein (PRP-1) and statherin generated by transglutaminase. Yao, Y., *et al.*, 930

GLYCOLYSIS
Effects of organic acid anions on growth, glycolysis, and intracellular pH of oral streptococci. Dashper, S.G. and Reynolds, E.C., 90

GLYCOSAMINOGLYCANS
Local injection of IFN-gamma reduces the number of myofibroblasts and the collagen content in palatal wounds. Cornelissen, A.M.H., *et al.*, 1782

GROWTH SUBSTANCES
Inhibition of Wnt signaling by exogenous Mfrzb1 protein affects molar tooth size. Sarkar, L. and Sharpe, P.T., 920
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

GTP-BINDING PROTEINS
Immunohistochemical localization of Gαq, PLCβ, Gαi1-2, PKA, and the endothelin B and extracellular Ca^{2+}-sensing receptors during early amelogenesis. Moran, R.A., *et al.*, 1896

GUIDELINES
Use of radiology practice guidelines and compliance with accreditation standards in US and Canadian dental schools. Kantor, M.L., 1532

HALITOSIS
Morning breath odor: influence of treatments on sulfur gases. Suarez, F.L., *et al.*, 1773

HAMMOND, BENJAMIN F.
Philadelphia story, A—featuring Ned Williams: microbiology at the University of Pennsylvania School of Dental Medicine. Rosan, B. and Hammond, B.F., 1451

HAMSTER
Immunolocalization and adenoviral vector-mediated manganese superoxide-dismutase gene transfer to experimental oral tumors. Lam, E.W.N., *et al.*, 1410

HAUSMANN, ERNEST
Forty-four years of dental research: role of education, teachers, research, and teaching. Hausmann, E., 1546

HEAD
Co-ordinated mandibular and head-neck movements during rhythmic jaw activities in man. Eriksson, P.-O., *et al.*, 1378
Effects of head and body position on two- and three-dimensional configurations of the upper airway. Ono, T., *et al.*, 1879

HEAT
Whisker-reinforced heat-cured dental resin composites: effects of filler level and heat-cure temperature and time. Xu, H.H.K., 1392

HEAT-SHOCK PROTEINS
Influence of environmental pH on the reactivity of *Candida albicans* with salivary IgA. Bikandi, J., *et al.*, 1439

HELICAL AXIS
Mandibular helical axis pathways during mastication. Gallo, L.M., *et al.*, 1566

HEMA (*see* Hydroxyethyl Methacrylate)

HEPATOCYTE GROWTH FACTOR
Prostaglandin E_2 predominantly induces production of hepatocyte growth factor/scatter factor in human dental pulp in acute inflammation. Ohnishi, T., *et al.*, 748

HEREDITARY DISEASES
Clinical and genetic analysis of a large north European Caucasian family affected by early-onset periodontitis. Hodge, P.J., *et al.*, 857
Evidence of genetic heterogeneity for hereditary gingival fibromatosis. Hart, T.C., *et al.*, 1758
No heritability of temporomandibular joint signs and symptoms. Michalowicz, B.S., *et al.*, 1573

HIP
Relationship between the density of the alveolar processes and that of post-cranial bone, The. Southard, K.A., *et al.*, 964

HISPANIC AMERICANS
Empirical test of the validity of the Oral Health Status Index (OHSI) on a minority population, An. Spolsky, V.W., *et al.*, 1983

HISTATINS
Molecular mapping of statherin- and histatin-binding domains in human salivary mucin MG1 (MUC5B) by the yeast two-hybrid system, 732

HISTORY OF DENTISTRY
Forty-four years of dental research: role of education, teachers, research, and teaching. Hausmann, E., 1546
From osseointegration to osseoperception. van Steenberghe, D., 1833
Historical development of salivary research in The Netherlands, The. Nieuw Amerongen, A.V., *et al.*, 1928
Odontoblast differentiation and tooth morphogenesis. Lesot, H., 1640
Philadelphia story, A—featuring Ned Williams: microbiology at the University of Pennsylvania School of Dental Medicine. Rosan, B. and Hammond, B.F., 1451
Road to preventive dentistry—the personal scientific experience of a Japanese dentist, The. Koga, T., 7
Rocky road of xylitol to its clinical application, The. Mäkinen, K.K., 1352
Temporomandibular disorders: moving from a dentally based to a medically based model. Greene, C.S. and Laskin, D.M., 1736

HIV-1
Proviral HIV-1 DNA in gingival crevicular fluid of HIV-1-infected patients in various stages of HIV disease. Maticic, M., *et al.*, 1496

HIV INFECTIONS
Prevalence of xerostomia and salivary gland hypofunction in a cohort of HIV-positive and at-risk women, The. Navazesh, M., *et al.*, 1502
Proviral HIV-1 DNA in gingival crevicular fluid of HIV-1-infected patients in various stages of HIV disease. Maticic, M., *et al.*, 1496
Use of dental care by HIV-infected medical patients. Coulter, I.D., *et al.*, 1356

HOMINIDAE
Her name is "Lucy," our three-million-year-old ancestor. Shields, E.D., 13

HUMERUS
Mandibular bone formation rates in aged ovariectomized rats treated with anti-resorptive agents alone and in combination with intermittent parathyroid hormone. Hunziker, J., *et al.*, 1431

HYDROGEN-ION CONCENTRATION
Effect of *in vitro* acidification on plaque fluid composition with and without a NaF or a controlled-release fluoride rinse. Vogel, G.L., *et al.*, 983
Effects of low-energy CO_2 laser irradiation and the organic matrix on inhibition of enamel demineralization. Hsu, C.-Y.S., *et al.*, 1725
Effects of organic acid anions on growth, glycolysis, and intracellular pH of oral streptococci. Dashper, S.G. and Reynolds, E.C., 90
H^+-induced tension development in demineralized dentin matrix. Pashley, D.H., *et al.*, 1579
Influence of environmental pH on the reactivity of *Candida albicans* with salivary IgA. Bikandi, J., *et al.*, 1439
pH of dental plaque in its relation to early enamel caries and dental plaque flora in humans, The. Lingström, P., *et al.*, 770
Relationship among mutans streptococci, "low-pH" bacteria, and iodophilic polysaccharide-producing bacteria in dental plaque and early enamel caries in humans. van Ruyven, F.O.J., *et al.*, 778

HYDROGEN PEROXIDE
Morning breath odor: influence of treatments on sulfur gases. Suarez, F.L., *et al.*, 1773

HYDROXYAPATITE (*see* Durapatite)

HYDROXYAPATITES
Evidence for charge domains on developing enamel crystal surfaces. Kirkham, J., *et al.*, 1943

HYDROXYETHYL METHACRYLATE
Bond strength of resin to acid-etched dentin studied by ^{13}C NMR: interaction between N-methacryloyl-ω-amino acid primer and dentinal collagen. Nishiyama, N., *et al.*, 806

HYDROXYL RADICAL
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489

HYDROXYPROLINE
Local injection of IFN-gamma reduces the number of myofibroblasts and the collagen content in palatal wounds. Cornelissen, A.M.H., *et al.*, 1782

HYPERGLYCEMIA
High glucose suppresses cathepsin activity in periodontal-ligament-derived fibroblastic cells. Nishimura, F., *et al.*, 1614

HYPODONTIA (*see* Anodontia)

HYPOGLOSSAL NERVE
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626

HYPOTHALAMUS
Effect of a cholecystokinin agonist on masseter muscle activity in the cat, The. Sitthisomwong, P., *et al.*, 1823

IADR/AADR
"DentalResearch2000.org." Offenbacher, S., 1537
Divisional and Sectional Abstracts, 1000
Errata for abstracts, 1341
IADR Abstracts, 106
World of oral research, The: how do we improve it? Jeffcoat, M.K., 1448

IgA, SECRETORY
Influence of environmental pH on the reactivity of *Candida albicans* with salivary IgA. Bikandi, J., *et al.*, 1439

IgG
Antigenic specificity of gingival crevicular fluid antibody to *Actinobacillus actinomycetemcomitans*. Ebersole, J.L., *et al.*, 1362

IMAGE PROCESSING, COMPUTER-ASSISTED
Optical scattering power for characterization of mineral loss. Ko, C.C., *et al.*, 1584

IMMUNIZATION
Antigenic specificity of gingival crevicular fluid antibody to *Actinobacillus actinomycetemcomitans*. Ebersole, J.L., *et al.*, 1362

IMMUNOBLOTTING
Collagenases in different categories of peri-implant vertical bone loss. Ma, J., *et al.*, 1870

IMMUNOFLUORESCENCE ANTIBODY TEST, INDIRECT (*see* Fluorescent Antibody Technique, Indirect)

IMMUNOFLUOROMETRIC ASSAY (*see* Fluoroimmunoassay)

IMMUNOGLOBULINS
Antigenic specificity of gingival crevicular fluid antibody to *Actinobacillus actinomycetemcomitans*. Ebersole, J.L., *et al.*, 1362

IMMUNOHISTOCHEMISTRY
Cyclooxygenase-2-dependent prostaglandin E_2 down-regulates intercellular adhesion molecule-1 expression *via* EP_2/EP_4 receptors in interleukin-1β-stimulated human gingival fibroblasts. Noguchi, K., *et al.*, 1955
Cytokine responses of oral epithelial cells to *Porphyromonas gingivalis* infection. Sandros, J., *et al.*, 1808
Development and characterization of a tissue-engineered human oral mucosa equivalent produced in a serum-free culture system. Izumi, K., *et al.*, 798
Expression of MMP-8 in human odontoblasts and dental pulp cells is down-regulated by TGF-β1, The. Palosaari, H., *et al.*, 77
Expression of mRNAs encoding for α and β integrin subunits, MMPs, and TIMPs in stretched human periodontal ligament and gingival fibroblasts. Bolcato-Bellemin, A.L., *et al.*, 1712
Immunohistochemical detection and distribution of enamelysin (MMP-20) in human odontogenic tumors. Takata, T., *et al.*, 1608
Immunohistochemical localization of Gαq, PLCβ, Gαi1-2, PKA, and the endothelin B and extracellular Ca^{2+}-sensing receptors during early amelogenesis. Moran, R.A., *et al.*, 1896
Immunolocalization and adenoviral vector-mediated manganese superoxide-dismutase gene transfer to experimental oral tumors. Lam, E.W.N., *et al.*, 1410
In vivo expression of the collagenolytic matrix metalloproteinases (MMP-2, -8, -13, and -14) and matrilysin (MMP-7) in adult and localized juvenile periodontitis, The. Tervahartiala, T., *et al.*, 1969
Local injection of IFN-gamma reduces the number of myofibroblasts and the collagen content in palatal wounds. Cornelissen, A.M.H., *et al.*, 1782
Myosin isoform composition of the human medial and lateral pterygoid muscles. Korfage, J.A.M. and van Eijden, T.M.G.J., 1618
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

IN SITU HYBRIDIZATION
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Cloning human enamelin cDNA, chromosomal localization, and analysis of expression during tooth development. Hu, C.-C., *et al.*, 912
Cytokine responses of oral epithelial cells to *Porphyromonas gingivalis* infection. Sandros, J., *et al.*, 1808
In vivo expression of the collagenolytic matrix metalloproteinases (MMP-2, -8, -13, and -14) and matrilysin (MMP-7) in adult and localized juvenile periodontitis, The. Tervahartiala, T., *et al.*, 1969
Localization of EMSP1 expression during tooth formation and cloning of mouse cDNA. Hu, J.C.-C., *et al.*, 70

INCISOR
Controlled study of the morphometric changes in the primary dentition of pre-term, very-low-birthweight children, A. Seow, W.K. and Wan, A., 63

INFANT
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740
Influence of maternal xylitol consumption on acquisition of mutans streptococci by infants, Söderling, E., *et al.*, 882
Oral colonization with *Actinomyces* species in infants by two years of age. Sarkonen, N., *et al.*, 864
Water-insoluble glucan synthesis by mutans streptococcal strains correlates with caries incidence in 12- to 30-month-old children. Mattos-Graner, R.O., *et al.*, 1371

INFANT, PREMATURE
Controlled study of the morphometric changes in the primary dentition of pre-term, very-low-birthweight children, A. Seow, W.K. and Wan, A., 63

INFECTION
Age, dental infections, and coronary heart disease. Mattila, K.J., *et al.*, 756
Quantification of periapical bone destruction in mice by micro-computed tomography. Balto, K., *et al.*, 35

INFLAMMATION
Acute-phase inflammatory response to periodontal disease in the US population. Slade, G.D., *et al.*, 49
Collagenases in different categories of peri-implant vertical bone loss. Ma, J., *et al.*, 1870
Induction of intracellular interleukin-1β signals *via* type II interleukin-1 receptor in human gingival fibroblasts. Chou, H.-H., *et al.*, 1683
Meal pattern analysis in response to temporomandibular joint inflammation in the rat. Harper, R.P., *et al.*, 1704
Prostaglandin E_2 enhances bradykinin-evoked iCGRP release in bovine dental pulp. Goodis, H.E., *et al.*, 1604
Prostaglandin E_2 predominantly induces production of hepatocyte growth factor/scatter factor in human dental pulp in acute inflammation. Ohnishi, T., *et al.*, 748

INFLAMMATION MEDIATORS
Prostaglandin E_2 predominantly induces production of hepatocyte growth factor/scatter factor in human dental pulp in acute inflammation. Ohnishi, T., *et al.*, 748

INOSITOL HEXASULPHATE
Inositol hexasulphate, a casein kinase inhibitor, alters enamel formation in cultured embryonic mouse tooth germs. Torres-Quintana, M.A., *et al.*, 1794

INTEGRINS
Expression of mRNAs encoding for α and β integrin subunits, MMPs, and TIMPs in stretched human periodontal ligament and gingival fibroblasts. Bolcato-Bellemin, A.L., *et al.*, 1712
High glucose suppresses cathepsin activity in periodontal-ligament-derived fibroblastic cells. Nishimura, F., *et al.*, 1614

INTERCELLULAR ADHESION MOLECULE-1
Cyclooxygenase-2-dependent prostaglandin E_2 down-regulates intercellular adhesion molecule-1 expression *via* EP_2/EP_4 receptors in interleukin-1β-stimulated human gingival fibroblasts. Noguchi, K., *et al.*, 1955

INTERFERON TYPE II
Cytokine profiles of T-lymphocytes from gingival tissues with pathological pocketing. Takeichi, O., *et al.*, 1548
Local injection of IFN-gamma reduces the number of myofibroblasts and the collagen content in palatal wounds. Cornelissen, A.M.H., *et al.*, 1782

INTERLEUKIN-1
Cyclooxygenase-2-dependent prostaglandin E_2 down-regulates intercellular adhesion molecule-1 expression *via* EP_2/EP_4 receptors in interleukin-1β-stimulated human gingival fibroblasts. Noguchi, K., *et al.*, 1955
Cytokine responses of oral epithelial cells to *Porphyromonas gingivalis* infection. Sandros, J., *et al.*, 1808
Induction of intracellular interleukin-1β signals *via* type II interleukin-1 receptor in human gingival fibroblasts. Chou, H.-H., *et al.*, 1683
Interleukin-1α-dependent regulation of matrix metalloproteinase-9 (MMP-9) secretion and activation in the epithelial cells of odontogenic jaw cysts. Kubota, Y., *et al.*, 1423
Polymorphisms in the IL-1A gene are correlated with levels of interleukin-1α protein in gingival crevicular fluid of teeth with severe periodontal disease. Shirodaria, S., *et al.*, 1864
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489

INTERLEUKINS
Adenoviral-mediated gene transfer to mouse salivary glands. Wang, S., *et al.*, 701
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675
Cytokine profiles of T-lymphocytes from gingival tissues with pathological pocketing. Takeichi, O., *et al.*, 1548
Cytokine responses of oral epithelial cells to *Porphyromonas gingivalis* infection. Sandros, J., *et al.*, 1808

IRON
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489

JAPAN
Road to preventive dentistry—the personal scientific experience of a Japanese dentist, The. Koga, T., 7

JAW
Co-ordinated mandibular and head-neck movements during rhythmic jaw activities in man. Eriksson, P.-O., *et al.*, 1378
Effect of a cholecystokinin agonist on masseter muscle activity in the cat, The. Sitthisomwong, P., *et al.*, 1823
Effect of food size on the movement of the mandibular first molars and condyles during deliberate unilateral mastication in humans. Miyawaki, S., *et al.*, 1525
Elevated intramuscular concentration of bradykinin in jaw muscle increases the fusimotor drive to neck muscles in the cat. Hellström, F., *et al.*, 1815
Interleukin-1α-dependent regulation of matrix metalloproteinase-9 (MMP-9) secretion and activation in the epithelial cells of odontogenic jaw cysts. Kubota, Y., *et al.*, 1423
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626
PTCH gene mutations in odontogenic keratocysts. Barreto, D.C., *et al.*, 1418
Stress-field translation in the healthy human temporomandibular joint. Gallo, L.M., *et al.*, 1740

JAW, EDENTULOUS
Acute-phase inflammatory response to periodontal disease in the US population. Slade, G.D., *et al.*, 49
Measuring the effect of intra-oral implant rehabilitation on health-related quality of life in a randomized controlled clinical trial. Awad, M.A., *et al.*, 1659

JOURNAL OF DENTAL RESEARCH
Changing face of the *JDR*, The. Herzberg, M.C., 4
Editor's report for the *Journal of Dental Research*, 1999. Herzberg, M.C., 5

JUDGMENT
Dentists' judgment strategies on prophylactic removal of mandibular third molars. Knutsson, K., *et al.*, 1989

KERATINOCYTES
Development and characterization of a tissue-engineered human oral mucosa equivalent produced in a serum-free culture system. Izumi, K., *et al.*, 798

KERATOCYSTS (*see* Odontogenic Cysts)

KI-67 ANTIGEN
Development and characterization of a tissue-engineered human oral mucosa equivalent produced in a serum-free culture system. Izumi, K., *et al.*, 798

KINEMATICS
Mandibular helical axis pathways during mastication. Gallo, L.M., *et al.*, 1566

LACTIC ACID
Effects of organic acid anions on growth, glycolysis, and intracellular pH of oral streptococci. Dashper, S.G. and Reynolds, E.C., 90

LASERS
Effects of low-energy CO_2 laser irradiation and the organic matrix on inhibition of enamel demineralization. Hsu, C.-Y.S., *et al.*, 1725

LEAKAGE (*see* Dental Leakage)

LESOT, HERVÉ
Odontoblast differentiation and tooth morphogenesis. Lesot, H., 1640

LEUCITE
High-temperature x-ray diffraction measurement of sanidine thermal expansion. Mackert, J.R., Jr., *et al.*, 1590

LINKAGE (GENETICS)
Clinical, radiographic, and genetic evaluation of a novel form of autosomal-dominant oligodontia. Goldenberg, M., *et al.*, 1469
Clinical and genetic analysis of a large north European Caucasian family affected by early-onset periodontitis. Hodge, P.J., *et al.*, 857
Evidence of genetic heterogeneity for hereditary gingival fibromatosis. Hart, T.C., *et al.*, 1758

LOGISTIC MODELS
Relaxation *vs.* cognitively oriented therapies for dental fear. Berggren, U., *et al.*, 1645

LUCIFERASE
Adenoviral-mediated gene transfer to mouse salivary glands. Wang, S., *et al.*, 701

LUMBOSACRAL REGION
Relationship between the density of the alveolar processes and that of post-cranial bone, The. Southard, K.A., *et al.*, 964

LYMPHOCYTES
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948
Cytokine profiles of T-lymphocytes from gingival tissues with pathological pocketing. Takeichi, O., *et al.*, 1548

MACROPHAGES
In vivo expression of the collagenolytic matrix metalloproteinases (MMP-2, -8, -13, and -14) and matrilysin (MMP-7) in adult and localized juvenile periodontitis, The. Tervahartiala, T., *et al.*, 1969

MAGNETIC RESONANCE IMAGING
Effects of head and body position on two- and three-dimensional configurations of the upper airway. Ono, T., *et al.*, 1879
Regional differences of metabolism in human masseter muscle by two-dimensional ^{31}P-chemical shift imaging. Kanayama, T., *et al.*, 85
Stress-field translation in the healthy human temporomandibular joint. Gallo, L.M., *et al.*, 1740

MANDIBLE
Biting and chewing in overdentures, full dentures, and natural dentitions. Fontijn-Tekamp, F.A., *et al.*, 1519
Co-ordinated mandibular and head-neck movements during rhythmic jaw activities in man. Eriksson, P.-O., *et al.*, 1378
Cortical potentials associated with voluntary mandibular movements. Yoshida, K., *et al.*, 1514
Dentists' judgment strategies on prophylactic removal of mandibular third molars. Knutsson, K., *et al.*, 1989
Inhibition of Wnt signaling by exogenous Mfrzb1 protein affects molar tooth size. Sarkar, L. and Sharpe, P.T., 920
Mandibular bone formation rates in aged ovariectomized rats treated with anti-resorptive agents alone and in combination with intermittent parathyroid hormone. Hunziker, J., *et al.*, 1431
Mandibular helical axis pathways during mastication. Gallo, L.M., *et al.*, 1566
Occlusal contacts during lateral excursions in children with primary dentition. Okamoto, A., *et al.*, 1890
Relationship between the density of the alveolar processes and that of post-cranial bone, The. Southard, K.A., *et al.*, 964

MANDIBULAR CONDYLE
Effect of food size on the movement of the mandibular first molars and condyles during deliberate unilateral mastication in humans. Miyawaki, S., *et al.*, 1525
Mandibular helical axis pathways during mastication. Gallo, L.M., *et al.*, 1566
Region-specific bone mass changes in rat mandibular condyle following ovariectomy. Tanaka, M., *et al.*, 1907
Stress-field translation in the healthy human temporomandibular joint. Gallo, L.M., *et al.*, 1740
Three-dimensional cancellous bone architecture of the human mandibular condyle, The. Giesen, E.B.W. and van Eijden, T.M.G.J., 957

MANGANESE
Immunolocalization and adenoviral vector-mediated manganese superoxide-dismutase gene transfer to experimental oral tumors. Lam, E.W.N., *et al.*, 1410

MAP KINASES (*see* Mitogen-Activated Protein Kinases)

MARGINAL ADAPTATION
Effects of adhesive thickness on polymerization contraction stress of composite, The. Choi, K.K., *et al.*, 812
Visco-elastic parameters of dental restorative materials during setting. Dauvillier, B.S., *et al.*, 818

MASSETER MUSCLE
Delayed embryonic development of mouse masseter muscle correlates with delayed myoD family expression. Yamane, A., *et al.*, 1933
Effect of a cholecystokinin agonist on masseter muscle activity in the cat, The. Sitthisomwong, P., *et al.*, 1823
Elevated intramuscular concentration of bradykinin in jaw muscle increases the fusimotor drive to neck muscles in the cat. Hellström, F., *et al.*, 1815
EMG power spectrum and motor unit characteristics in the masseter muscle of the rabbit. Turkawski, S.J.J. and van Eijden, T.M.G.J., 950
Regional differences of metabolism in human masseter muscle by two-dimensional ^{31}P-chemical shift imaging. Kanayama, T., *et al.*, 85

MASTICATION
Association of salivary flow rates with maximal bite force. Yeh, C.-K., *et al.*, 1560
Biting and chewing in overdentures, full dentures, and natural dentitions. Fontijn-Tekamp, F.A., *et al.*, 1519
Co-ordinated mandibular and head-neck movements during rhythmic jaw activities in man. Eriksson, P.-O., *et al.*, 1378
Effect of food size on the movement of the mandibular first molars and condyles during deliberate unilateral mastication in humans. Miyawaki, S., *et al.*, 1525
Mandibular helical axis pathways during mastication. Gallo, L.M., *et al.*, 1566
Stress-field translation in the healthy human temporomandibular joint. Gallo, L.M., *et al.*, 1740

MASTICATORY MUSCLES
Cortical potentials associated with voluntary mandibular movements. Yoshida, K., *et al.*, 1514
EMG power spectrum and motor unit characteristics in the masseter muscle of the rabbit. Turkawski, S.J.J. and van Eijden, T.M.G.J., 950
Myosin isoform composition of the human medial and lateral pterygoid muscles Korfage, J.A.M. and van Eijden, T.M.G.J., 1618

MATERIALS TESTING
Antibacterial activities and release kinetics of a newly developed recoverable controlled agent-release system. Ehara, A., *et al.*, 824
Design and wear testing of a temporomandibular joint prosthesis articulation. van Loon, J.-P., *et al.*, 715
Effects of adhesive thickness on polymerization contraction stress of composite, The. Choi, K.K., *et al.*, 812
Lifetime-limiting strength degradation from contact fatigue in dental ceramics. Jung, Y.-G., *et al.*, 722
Nominal shear or fracture mechanics in the assessment of composite-dentin adhesion? Tantbirojn, D., *et al.*, 41
Visco-elastic parameters of dental restorative materials during setting. Dauvillier, B.S., *et al.*, 818

MATRILYSIN
In vivo expression of the collagenolytic matrix metalloproteinases (MMP-2, -8, -13, and -14) and matrilysin (MMP-7) in adult and localized juvenile periodontitis, The. Tervahartiala, T., *et al.*, 1969

MATRIX METALLOPROTEINASES
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Expression of MMP-8 in human odontoblasts and dental pulp cells is down-regulated by TGF-β1, The. Palosaari, H., *et al.*, 77
Expression of mRNAs encoding for α and β integrin subunits, MMPs, and TIMPs in stretched human periodontal ligament and gingival fibroblasts. Bolcato-Bellemin, A.L., *et al.*, 1712
Immunohistochemical detection and distribution of enamelysin (MMP-20) in human odontogenic tumors. Takata, T., *et al.*, 1608
In vivo expression of the collagenolytic matrix metalloproteinases (MMP-2, -8, -13, and -14) and matrilysin (MMP-7) in adult and localized juvenile periodontitis, The. Tervahartiala, T., *et al.*, 1969
Interleukin-1α-dependent regulation of matrix metalloproteinase-9 (MMP-9) secretion and activation in the epithelial cells of odontogenic jaw cysts. Kubota, Y., *et al.*, 1423

MATRIX PROTEINS (*see* Extracellular Matrix Proteins)

MAXILLA
Relationship between the density of the alveolar processes and that of post-cranial bone, The. Southard, K.A., *et al.*, 964

MECAMYLAMINE
Choline acetyltransferase, acetylcholinesterase, and nicotinic acetylcholine receptors of human gingival and esophageal epithelia. Thuong Nguyen, V., *et al.*, 939

MENTAL HEALTH
Self-perceived oral health status, psychological well-being, and life satisfaction in an older adult population. Locker, D., *et al.*, 970

MERCURY POISONING
Diagnostic value of a chelating agent in patients

with symptoms allegedly caused by amalgam fillings. Vamnes, J.S., *et al.*, 868

METALLOPROTEINASES (*see* Matrix Metalloproteinases)

METHACRYLATES
Antibacterial activities and release kinetics of a newly developed recoverable controlled agent-release system. Ehara, A., *et al.*, 824
Bond strength of resin to acid-etched dentin studied by ^{13}C NMR: interaction between N-methacryloyl-ω-amino acid primer and dentinal collagen. Nishiyama, N., *et al.*, 806
Estrogenicity of fissure sealants and adhesive resins determined by reporter gene assay. Tarumi, H., *et al.*, 1838
MALDI-TOF MS analysis of a library of polymerizable cyclodextrin derivatives. Bowen, R.L., *et al.*, 905

MICE
Adenoviral-mediated gene transfer to mouse salivary glands. Wang, S., *et al.*, 701
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Delayed embryonic development of mouse masseter muscle correlates with delayed myoD family expression. Yamane, A., *et al.*, 1933
Inositol hexasulphate, a casein kinase inhibitor, alters enamel formation in cultured embryonic mouse tooth germs. Torres-Quintana, M.A., *et al.*, 1794
Localization of EMSP1 expression during tooth formation and cloning of mouse cDNA. Hu, J.C.-C., *et al.*, 70
Osteoprotegerin and osteoclast differentiation factor in tooth eruption. Wise, G.E., *et al.*, 1937
Quantification of periapical bone destruction in mice by micro-computed tomography. Balto, K., *et al.*, 35

MICE, TRANSGENIC
Collagen XII mutation disrupts matrix structure of periodontal ligament and skin. Reichenberger, E. , *et al.*, 1962
Low levels of GRP-Ca expression in transgenic mice. Ten Hagen, K.G. and Balys, M.M., 926

MICROBIOLOGY
Philadelphia story, A—featuring Ned Williams: microbiology at the University of Pennsylvania School of Dental Medicine. Rosan, B. and Hammond, B.F., 1451

MICRORADIOGRAPHY
Effects of low-energy CO_2 laser irradiation and the organic matrix on inhibition of enamel demineralization. Hsu, C.-Y.S., *et al.*, 1725

MICROSCOPY
Interfacial chemistry of the dentin/adhesive bond. Spencer, P., *et al.*, 1458
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

MICROSCOPY, ATOMIC FORCE
Dose-dependent modulation of octacalcium phosphate crystal habit by amelogenins. Wen, H.B., *et al.*, 1902
Electron microscopy, micro-analysis, and x-ray diffraction characterization of the mineral-like tissue deposited by human cementum tumor-derived cells. Arzate, H., *et al.*, 28
Evidence for charge domains on developing enamel crystal surfaces. Kirkham, J., *et al.*, 1943

MICROSCOPY, CONFOCAL
Architecture of intact natural human plaque biofilms studied by confocal laser scanning microscopy. Wood, S.R., *et al.*, 21
Collagen XII mutation disrupts matrix structure of periodontal ligament and skin. Reichenberger, E. , *et al.*, 1962

MICROSCOPY, ELECTRON
Inositol hexasulphate, a casein kinase inhibitor, alters enamel formation in cultured embryonic mouse tooth germs. Torres-Quintana, M.A., *et al.*, 1794

MICROSCOPY, ELECTRON, SCANNING
Crack initiation modes in bilayered alumina/porcelain disks as a function of core/veneer thickness ratio and supporting stiffness. Wakabayashi, N. and Anusavice, K.J., 1398
Dose-dependent modulation of octacalcium phosphate crystal habit by amelogenins. Wen, H.B., *et al.*, 1902
Effects of low-energy CO_2 laser irradiation and the organic matrix on inhibition of enamel demineralization. Hsu, C.-Y.S., *et al.*, 1725
In vivo degradation of resin-dentin bonds in humans over 1 to 3 years. Hashimoto, M., *et al.*, 1385
Nominal shear or fracture mechanics in the assessment of composite-dentin adhesion? Tantbirojn, D., *et al.*, 41
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476
Whisker-reinforced heat-cured dental resin composites: effects of filler level and heat-cure temperature and time. Xu, H.H.K., 1392

MICROSCOPY, ELECTRON, SCANNING TRANSMISSION
Dose-dependent modulation of octacalcium phosphate crystal habit by amelogenins. Wen, H.B., *et al.*, 1902
Electron microscopy, micro-analysis, and x-ray diffraction characterization of the mineral-like tissue deposited by human cementum tumor-derived cells. Arzate, H., *et al.*, 28
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

MICROSCOPY, POLARIZATION
Effects of low-energy CO_2 laser irradiation and the organic matrix on inhibition of enamel demineralization. Hsu, C.-Y.S., *et al.*, 1725

MINORITY GROUPS
Empirical test of the validity of the Oral Health Status Index (OHSI) on a minority population, An. Spolsky, V.W., *et al.*, 1983

MITOGEN-ACTIVATED PROTEIN KINASES
Inositol hexasulphate, a casein kinase inhibitor, alters enamel formation in cultured embryonic mouse tooth germs. Torres-Quintana, M.A., *et al.*, 1794
Role of MAP kinases $p42^{erk-2}/p44^{erk-1}$ in cementum-derived attachment-protein-mediated cell attachment. Komaki, M., *et al.*, 1789

MODELS, STATISTICAL
Between-subject and within-subject statistical information in dental research. Mancl, L.A., *et al.*, 1778

MOLAR
Effect of food size on the movement of the mandibular first molars and condyles during deliberate unilateral mastication in humans. Miyawaki, S., *et al.*, 1525
Inhibition of Wnt signaling by exogenous Mfrzb1 protein affects molar tooth size. Sarkar, L. and Sharpe, P.T., 920
Time-dependent decrease and seasonal variation of the porosity of recently erupted sound dental enamel *in vivo*. ten Bosch, J.J., *et al.*, 1556

MOLAR, THIRD
Dentists' judgment strategies on prophylactic removal of mandibular third molars. Knutsson, K., *et al.*, 1989

MOLECULAR WEIGHT
Mass spectrometry of native rat amelogenins: primary transcripts, secretory isoforms, and C-terminal degradation. Chen, W.-Y., *et al.*, 840
Molecular mapping of statherin- and histatin-binding domains in human salivary mucin MG1 (MUC5B) by the yeast two-hybrid system, 732

MONTE CARLO METHOD
Optical scattering power for characterization of mineral loss. Ko, C.C., *et al.*, 1584

MOTHERS
Effects of a break in water fluoridation on the development of dental caries and fluorosis, The. Burt, B.A., *et al.*, 761
Influence of maternal xylitol consumption on acquisition of mutans streptococci by infants, Söderling, E., *et al.*, 882
Occurrence of dental decay in children after maternal consumption of xylitol chewing gum, a follow-up from 0 to 5 years. Isokangas, P., *et al.*, 1885

MOTOR CORTEX
Cortical potentials associated with voluntary mandibular movements. Yoshida, K., *et al.*, 1514

MOTOR NEURONS
EMG power spectrum and motor unit characteristics in the masseter muscle of the rabbit. Turkawski, S.J.J. and van Eijden, T.M.G.J., 950
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626

MOTOR NEURONS, GAMMA
Elevated intramuscular concentration of bradykinin in jaw muscle increases the fusimotor drive to neck muscles in the cat. Hellström, F., *et al.*, 1815

MOTTLED ENAMEL (*see* Fluorosis, Dental)

MOUTH
Influence of environmental pH on the reactivity of *Candida albicans* with salivary IgA. Bikandi, J., *et al.*, 1439
Morning breath odor: influence of treatments on sulfur gases. Suarez, F.L., *et al.*, 1773
Oral colonization with *Actinomyces* species in infants by two years of age. Sarkonen, N., *et al.*, 864

MOUTH, EDENTULOUS
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740

MOUTHWASHES
Effect of *in vitro* acidification on plaque fluid composition with and without a NaF or a controlled-release fluoride rinse. Vogel, G.L., *et al.*, 983
Remineralization effects of a two-solution fluoride mouthrinse: an *in situ* study. Chow, L.C., *et al.*, 991

MOVEMENT
Co-ordinated mandibular and head-neck movements during rhythmic jaw activities in man. Eriksson, P.-O., *et al.*, 1378
Effect of food size on the movement of the mandibular first molars and condyles during deliberate unilateral mastication in humans. Miyawaki, S., *et al.*, 1525
Mandibular helical axis pathways during mastication. Gallo, L.M., *et al.*, 1566
Stress-field translation in the healthy human temporomandibular joint. Gallo, L.M., *et al.*, 1740

MUCINS
Immunoquantification of human salivary mucins MG1 and MG2 in stimulated whole saliva: factors influencing mucin levels. Rayment, S.A., *et al.*, 1765

Molecular mapping of statherin- and histatin-binding domains in human salivary mucin MG1 (MUC5B) by the yeast two-hybrid system, 732

MUSCLE, SKELETAL
Delayed embryonic development of mouse masseter muscle correlates with delayed myoD family expression. Yamane, A., *et al.*, 1933

MUSCLE FIBERS
EMG power spectrum and motor unit characteristics in the masseter muscle of the rabbit. Turkawski, S.J.J. and van Eijden, T.M.G.J., 950
Myosin isoform composition of the human medial and lateral pterygoid muscles. Korfage, J.A.M. and van Eijden, T.M.G.J., 1618
Regional differences of metabolism in human masseter muscle by two-dimensional ^{31}P-chemical shift imaging. Kanayama, T., *et al.*, 85

MUSCLE SPINDLES
Elevated intramuscular concentration of bradykinin in jaw muscle increases the fusimotor drive to neck muscles in the cat. Hellström, F., *et al.*, 1815
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626

MUTATION
Collagen XII mutation disrupts matrix structure of periodontal ligament and skin. Reichenberger, E. , *et al.*, 1962
Detection of a novel mutation in X-linked amelogenesis imperfecta. Kindelan, S.A., *et al.*, 1978
PTCH gene mutations in odontogenic keratocysts. Barreto, D.C., *et al.*, 1418
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

MUTATION, MISSENSE
Clinical, radiographic, and genetic evaluation of a novel form of autosomal-dominant oligodontia. Goldenberg, M., *et al.*, 1469
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

MYCOBACTERIUM INFECTIONS
Antibodies against mycobacterial antigens in the synovial fluid of patients with temporomandibular disorders. Adachi, N., *et al.*, 1752

MYOD PROTEIN
Delayed embryonic development of mouse masseter muscle correlates with delayed myoD family expression. Yamane, A., *et al.*, 1933

MYOGENESIS (*see* Muscle, Skeletal)

MYOSIN HEAVY CHAINS
Myosin isoform composition of the human medial and lateral pterygoid muscles. Korfage, J.A.M. and van Eijden, T.M.G.J., 1618

NATIONAL INSTITUTE OF DENTAL AND CRANIOFACIAL RESEARCH
International collaborative research on fluoride. Cohen, L., *et al.*, 893

NECK
Co-ordinated mandibular and head-neck movements during rhythmic jaw activities in man. Eriksson, P.-O., *et al.*, 1378

NECK MUSCLES
Elevated intramuscular concentration of bradykinin in jaw muscle increases the fusimotor drive to neck muscles in the cat. Hellström, F., *et al.*, 1815

NEOPLASMS, SQUAMOUS CELL
AgNOR are sensitive markers of radiation lesions in squamous epithelia. Ielmini, M.V., *et al.*, 850

NERVE TISSUE PROTEIN S100
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740

NETHERLANDS
Historical development of salivary research in The Netherlands, The. Nieuw Amerongen, A.V., *et al.*, 1928

NEURONS, AFFERENT
Elevated intramuscular concentration of bradykinin in jaw muscle increases the fusimotor drive to neck muscles in the cat. Hellström, F., *et al.*, 1815
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626

NEUTROPHIL COLLAGENASE
Expression of MMP-8 in human odontoblasts and dental pulp cells is down-regulated by TGF-β1, The. Palosaari, H., *et al.*, 77

NEUTROPHILS
In vivo expression of the collagenolytic matrix metalloproteinases (MMP-2, -8, -13, and -14) and matrilysin (MMP-7) in adult and localized juvenile periodontitis, The. Tervahartiala, T., *et al.*, 1969
Interactions of human neutrophils with the constituents of an experimental dental biofilm, The. Shapira, L., *et al.*, 1802

NEVOID BASAL CELL CARCINOMA SYNDROME
PTCH gene mutations in odontogenic keratocysts. Barreto, D.C., *et al.*, 1418

NHANES (*see* Dental Health Surveys)

NUCLEAR MAGNETIC RESONANCE
Bond strength of resin to acid-etched dentin studied by ^{13}C NMR: interaction between N-methacryloyl-ω-amino acid primer and dentinal collagen. Nishiyama, N., *et al.*, 806
Regional differences of metabolism in human masseter muscle by two-dimensional ^{31}P-chemical shift imaging. Kanayama, T., *et al.*, 85

NUCLEOLUS ORGANIZER REGION
AgNOR are sensitive markers of radiation lesions in squamous epithelia. Ielmini, M.V., *et al.*, 850

NUTRITION SURVEYS
Acute-phase inflammatory response to periodontal disease in the US population. Slade, G.D., *et al.*, 49

OCTACALCIUM
Dose-dependent modulation of octacalcium phosphate crystal habit by amelogenins. Wen, H.B., *et al.*, 1902

ODONTOBLASTS
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Effects of TGFβ1 on dental pulp cells in cultured human tooth slices. Melin, M., *et al.*, 1689
Expression of MMP-8 in human odontoblasts and dental pulp cells is down-regulated by TGF-β1, The. Palosaari, H., *et al.*, 77
N-terminal sequence analysis of bovin dentin phosphophoryn after conversion of phosphoseryl to *S*-propylcysteinyl residues. Huq, N.L., *et al.*, 1914
Odontoblast differentiation and tooth morphogenesis. Lesot, H., 1640

ODONTOGENESIS
Cloning human enamelin cDNA, chromosomal localization, and analysis of expression during tooth development. Hu, C.-C., *et al.*, 912
Inhibition of Wnt signaling by exogenous Mfrzb1 protein affects molar tooth size. Sarkar, L. and Sharpe, P.T., 920

ODONTOGENIC CYSTS
Immunohistochemical detection and distribution of enamelysin (MMP-20) in human odontogenic tumors. Takata, T., *et al.*, 1608
Interleukin-1α-dependent regulation of matrix metalloproteinase-9 (MMP-9) secretion and activation in the epithelial cells of odontogenic jaw cysts. Kubota, Y., *et al.*, 1423
PTCH gene mutations in odontogenic keratocysts. Barreto, D.C., *et al.*, 1418

ODONTOGENIC TUMORS
Electron microscopy, micro-analysis, and x-ray diffraction characterization of the mineral-like tissue deposited by human cementum tumor-derived cells. Arzate, H., *et al.*, 28
Immunohistochemical detection and distribution of enamelysin (MMP-20) in human odontogenic tumors. Takata, T., *et al.*, 1608

ODONTOMA
Immunohistochemical detection and distribution of enamelysin (MMP-20) in human odontogenic tumors. Takata, T., *et al.*, 1608

ODONTOMETRY
Controlled study of the morphometric changes in the primary dentition of pre-term, very-low-birthweight children, A. Seow, W.K. and Wan, A., 63

ODORS
Morning breath odor: influence of treatments on sulfur gases. Suarez, F.L., *et al.*, 1773

OLIGODONTIA
Clinical, radiographic, and genetic evaluation of a novel form of autosomal-dominant oligodontia. Goldenberg, M., *et al.*, 1469

OLIGONUCLEOTIDES, ANTISENSE
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

OPTICS
Optical scattering power for characterization of mineral loss. Ko, C.C., *et al.*, 1584

ORAL CAVITY (*see* Mouth)

ORAL HEALTH
Empirical test of the validity of the Oral Health Status Index (OHSI) on a minority population, An. Spolsky, V.W., *et al.*, 1983
Measuring the effect of intra-oral implant rehabilitation on health-related quality of life in a randomized controlled clinical trial. Awad, M.A., *et al.*, 1659
Self-perceived oral health status, psychological well-being, and life satisfaction in an older adult population. Locker, D., *et al.*, 970

ORAL HYGIENE
Caries in five-year-old children and associations with family-related factors. Mattila, M.-L., *et al.*, 875

ORAL MUCOSA
AgNOR are sensitive markers of radiation lesions in squamous epithelia. Ielmini, M.V., *et al.*, 850
Development and characterization of a tissue-engineered human oral mucosa equivalent produced in a serum-free culture system. Izumi, K., *et al.*, 798
Oral colonization with *Actinomyces* species in infants by two years of age. Sarkonen, N., *et al.*, 864

ORAL NEOPLASMS
Immunolocalization and adenoviral vector-mediated manganese superoxide-dismutase gene

transfer to experimental oral tumors. Lam, E.W.N., *et al.*, 1410

ORAL SURGICAL PROCEDURES
Dentists' judgment strategies on prophylactic removal of mandibular third molars. Knutsson, K., *et al.*, 1989
Development and characterization of a tissue-engineered human oral mucosa equivalent produced in a serum-free culture system. Izumi, K., *et al.*, 798

OSCILLOMETRY
Feasibility of computer-assisted recognition of different dental hard tissues. Kocher, T., *et al.*, 829

OSSEOINTEGRATION
Biomechanical evaluation of osseous implants having different surface topographies in rats. Ogawa, T., *et al.*, 1857
Collagenases in different categories of peri-implant vertical bone loss. Ma, J., *et al.*, 1870
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675
From osseointegration to osseoperception. van Steenberghe, D., 1833

OSTEOBLASTS
Electron microscopy, micro-analysis, and x-ray diffraction characterization of the mineral-like tissue deposited by human cementum tumor-derived cells. Arzate, H., *et al.*, 28

OSTEOCLASTS
Osteoprotegerin and osteoclast differentiation factor in tooth eruption. Wise, G.E., *et al.*, 1937

OSTEOGENESIS
Mandibular bone formation rates in aged ovariectomized rats treated with anti-resorptive agents alone and in combination with intermittent parathyroid hormone. Hunziker, J., *et al.*, 1431

OSTEOPONTIN
Cementum attachment protein enriches putative cementoblastic populations on root surfaces *in vitro*. BarKana, I., *et al.*, 1482

OSTEOPOROSIS
Mandibular bone formation rates in aged ovariectomized rats treated with anti-resorptive agents alone and in combination with intermittent parathyroid hormone. Hunziker, J., *et al.*, 1431
Region-specific bone mass changes in rat mandibular condyle following ovariectomy. Tanaka, M., *et al.*, 1907

OVARIECTOMY
Region-specific bone mass changes in rat mandibular condyle following ovariectomy. Tanaka, M., *et al.*, 1907

OXIDATIVE STRESS
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489

P42 MAP KINASE
Role of MAP kinases p42^{erk-2}/p44^{erk-1} in cementum-derived attachment-protein-mediated cell attachment. Komaki, M., *et al.*, 1789

PAIN
Elevated intramuscular concentration of bradykinin in jaw muscle increases the fusimotor drive to neck muscles in the cat. Hellström, F., *et al.*, 1815
Prostaglandin E_2 enhances bradykinin-evoked iCGRP release in bovine dental pulp. Goodis, H.E., *et al.*, 1604

PALATE
Local injection of IFN-gamma reduces the number of myofibroblasts and the collagen content in palatal wounds. Cornelissen, A.M.H., *et al.*, 1782

PARATHYROID HORMONE
Local and chronic application of PTH accelerates tooth movement in rats. Soma, S., *et al.*, 1717
Mandibular bone formation rates in aged ovariectomized rats treated with anti-resorptive agents alone and in combination with intermittent parathyroid hormone. Hunziker, J., *et al.*, 1431
Osteoprotegerin and osteoclast differentiation factor in tooth eruption. Wise, G.E., *et al.*, 1937

PAROTID GLAND
Association of basic proline-rich peptides from human parotid gland secretions with caries experience, The. Ayad, M., *et al.*, 976
Determination of variation of stimulated salivary flow rates. Ghezzi, E.M., *et al.*, 1874

PATIENT SELECTION
Use of radiology practice guidelines and compliance with accreditation standards in US and Canadian dental schools. Kantor, M.L., 1532

PATTERN RECOGNITION
Feasibility of computer-assisted recognition of different dental hard tissues. Kocher, T., *et al.*, 829

PEDIGREE
Clinical, radiographic, and genetic evaluation of a novel form of autosomal-dominant oligodontia. Goldenberg, M., *et al.*, 1469
Clinical and genetic analysis of a large north European Caucasian family affected by early-onset periodontitis. Hodge, P.J., *et al.*, 857

PELLICLE
Pellicle precursor protein crosslinking: characterization of an adduct between acidic proline-rich protein (PRP-1) and statherin generated by transglutaminase. Yao, Y., *et al.*, 930

PENTAGASTRIN
Effect of a cholecystokinin agonist on masseter muscle activity in the cat, The. Sitthisomwong, P., *et al.*, 1823

PEPTIDE ANTIBIOTICS (*see* Antibiotics, Peptide)

PEPTIDES
Association of basic proline-rich peptides from human parotid gland secretions with caries experience, The. Ayad, M., *et al.*, 976

PERIAPICAL TISSUE
Quantification of periapical bone destruction in mice by micro-computed tomography. Balto, K., *et al.*, 35

PERIODONTAL DISEASES
Acute-phase inflammatory response to periodontal disease in the US population. Slade, G.D., *et al.*, 49
Between-subject and within-subject statistical information in dental research. Mancl, L.A., *et al.*, 1778
Cyclooxygenase-2-dependent prostaglandin E_2 down-regulates intercellular adhesion molecule-1 expression *via* EP_2/EP_4 receptors in interleukin-1β-stimulated human gingival fibroblasts. Noguchi, K., *et al.*, 1955
Cytokine profiles of T-lymphocytes from gingival tissues with pathological pocketing. Takeichi, O., *et al.*, 1548
Electron microscopy, micro-analysis, and x-ray diffraction characterization of the mineral-like tissue deposited by human cementum tumor-derived cells. Arzate, H., *et al.*, 28
Polymorphisms in the IL-1A gene are correlated with levels of interleukin-1α protein in gingival crevicular fluid of teeth with severe periodontal disease. Shirodaria, S., *et al.*, 1864

PERIODONTAL LIGAMENT
Cementum attachment protein enriches putative cementoblastic populations on root surfaces *in vitro*. BarKana, I., *et al.*, 1482
Collagen XII mutation disrupts matrix structure of periodontal ligament and skin. Reichenberger, E. , *et al.*, 1962
Expression of mRNAs encoding for α and β integrin subunits, MMPs, and TIMPs in stretched human periodontal ligament and gingival fibroblasts. Bolcato-Bellemin, A.L., *et al.*, 1712
High glucose suppresses cathepsin activity in periodontal-ligament-derived fibroblastic cells. Nishimura, F., *et al.*, 1614
Role of MAP kinases p42^{erk-2}/p44^{erk-1} in cementum-derived attachment-protein-mediated cell attachment. Komaki, M., *et al.*, 1789

PERIODONTAL POCKETS
Cytokine profiles of T-lymphocytes from gingival tissues with pathological pocketing. Takeichi, O., *et al.*, 1548
Cytokine responses of oral epithelial cells to *Porphyromonas gingivalis* infection. Sandros, J., *et al.*, 1808

PERIODONTITIS
Age, dental infections, and coronary heart disease. Mattila, K.J., *et al.*, 756
Antigenic specificity of gingival crevicular fluid antibody to *Actinobacillus actinomycetemcomitans*. Ebersole, J.L., *et al.*, 1362
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948
Campylobacter species in health, gingivitis, and periodontitis. Macuch, P.J. and Tanner, A.C.R., 785
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740
In vivo expression of the collagenolytic matrix metalloproteinases (MMP-2, -8, -13, and -14) and matrilysin (MMP-7) in adult and localized juvenile periodontitis, The. Tervahartiala, T., *et al.*, 1969
Prevalence of specific genotypes of *Porphyromonas gingivalis fimA* and periodontal health status. Amano, A., *et al.*, 1664

PERIODONTITIS, JUVENILE
Clinical and genetic analysis of a large north European Caucasian family affected by early-onset periodontitis. Hodge, P.J., *et al.*, 857
In vivo expression of the collagenolytic matrix metalloproteinases (MMP-2, -8, -13, and -14) and matrilysin (MMP-7) in adult and localized juvenile periodontitis, The. Tervahartiala, T., *et al.*, 1969

PERIODONTIUM
Prevalence of specific genotypes of *Porphyromonas gingivalis fimA* and periodontal health status. Amano, A., *et al.*, 1664

PERIODONTOLOGY
From osseointegration to osseoperception. van Steenberghe, D., 1833

pH (*see* Hydrogen-Ion Concentration)

PHARMACEUTICAL PREPARATIONS
Low unstimulated salivary flow and subjective oral dryness: association with medication, anxiety, depression, and stress. Bergdahl, M. and Bergdahl, J., 1652

PHENOTYPE
Clinical, radiographic, and genetic evaluation of a novel form of autosomal-dominant oligodontia. Goldenberg, M., *et al.*, 1469
Detection of a novel mutation in X-linked amelogenesis imperfecta. Kindelan, S.A., *et al.*, 1978
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

PHOSPHATES
Regional differences of metabolism in human

masseter muscle by two-dimensional ^{31}P-chemical shift imaging. Kanayama, T., *et al.*, 85

PHOSPHOCREATINE
Regional differences of metabolism in human masseter muscle by two-dimensional ^{31}P-chemical shift imaging. Kanayama, T., *et al.*, 85

PHOSPHOPROTEINS
Molecular mapping of statherin- and histatin-binding domains in human salivary mucin MG1 (MUC5B) by the yeast two-hybrid system, 732
N-terminal sequence analysis of bovine dentin phosphophoryn after conversion of phosphoseryl to S-propylcysteinyl residues. Huq, N.L., *et al.*, 1914
Non-collagenous dentin matrix proteins are involved in dentinogenesis imperfecta type II (DGI-II), The. Thotakura, S.R., *et al.*, 835

PHOSPHORYLATION
Induction of intracellular interleukin-1β signals *via* type II interleukin-1 receptor in human gingival fibroblasts. Chou, H.-H., *et al.*, 1683
Inositol hexasulphate, a casein kinase inhibitor, alters enamel formation in cultured embryonic mouse tooth germs. Torres-Quintana, M.A., *et al.*, 1794

PHYLOGENY
Her name is "Lucy," our three-million-year-old ancestor. Shields, E.D., 13

PIGS (*see* Swine)

PIT AND FISSURE SEALANTS
Estrogenicity of fissure sealants and adhesive resins determined by reporter gene assay. Tarumi, H., *et al.*, 1838
Improved sealant retention with bonding agents: a clinical study of two-bottle and single-bottle systems. Feigal, R.J., *et al.*, 1850

POINT MUTATION
Unique enamel phenotype associated with amelogenin gene (AMELX) codon 41 point mutation. Ravassipour, D.B., *et al.*, 1476

POLYALKENOATE CEMENTS (*see* Glass-ionomer Cements)

POLYETHYLENE
Design and wear testing of a temporomandibular joint prosthesis articulation. van Loon, J.-P., *et al.*, 715

POLYMERASE CHAIN REACTION
Clinical, radiographic, and genetic evaluation of a novel form of autosomal-dominant oligodontia. Goldenberg, M., *et al.*, 1469
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Delayed embryonic development of mouse masseter muscle correlates with delayed myoD family expression. Yamane, A., *et al.*, 1933
Detection of a novel mutation in X-linked amelogenesis imperfecta. Kindelan, S.A., *et al.*, 1978
Expression of MMP-8 in human odontoblasts and dental pulp cells is down-regulated by TGF-β1, The. Palosaari, H., *et al.*, 77
Prevalence of specific genotypes of *Porphyromonas gingivalis fimA* and periodontal health status. Amano, A., *et al.*, 1664
Prostaglandin E_2 predominantly induces production of hepatocyte growth factor/scatter factor in human dental pulp in acute inflammation. Ohnishi, T., *et al.*, 748
Proviral HIV-1 DNA in gingival crevicular fluid of HIV-1-infected patients in various stages of HIV disease. Maticic, M., *et al.*, 1496
PTCH gene mutations in odontogenic keratocysts. Barreto, D.C., *et al.*, 1418

POLYMERASE CHAIN REACTION, REVERSE TRANSCRIPTASE (*see* Reverse Transcriptase Polymerase Chain Reaction)

POLYMERIZATION CONTRACTION
Effects of adhesive thickness on polymerization contraction stress of composite, The. Choi, K.K., *et al.*, 812

POLYMERS
MALDI-TOF MS analysis of a library of polymerizable cyclodextrin derivatives. Bowen, R.L., *et al.*, 905

POLYMORPHISM, RESTRICTION FRAGMENT LENGTH
Non-collagenous dentin matrix proteins are involved in dentinogenesis imperfecta type II (DGI-II), The. Thotakura, S.R., *et al.*, 835

POLYMORPHISM (GENETICS)
Polymorphisms in the IL-1A gene are correlated with levels of interleukin-1α protein in gingival crevicular fluid of teeth with severe periodontal disease. Shirodaria, S., *et al.*, 1864

POLYSACCHARIDES
Influence of environmental pH on the reactivity of *Candida albicans* with salivary IgA. Bikandi, J., *et al.*, 1439

POLYSACCHARIDES, BATERIAL
Relationship among mutans streptococci, "low-pH" bacteria, and iodophilic polysaccharide-producing bacteria in dental plaque and early enamel caries in humans. van Ruyven, F.O.J., *et al.*, 778

PORCELAIN (*see* Dental Porcelain)

POROSITY
Time-dependent decrease and seasonal variation of the porosity of recently erupted sound dental enamel *in vivo*. ten Bosch, J.J., *et al.*, 1556

PORPHYROMONAS GINGIVALIS
Cytokine responses of oral epithelial cells to *Porphyromonas gingivalis* infection. Sandros, J., *et al.*, 1808
Prevalence of specific genotypes of *Porphyromonas gingivalis fimA* and periodontal health status. Amano, A., *et al.*, 1664

POTASSIUM COMPOUNDS
High-temperature x-ray diffraction measurement of sanidine thermal expansion. Mackert, J.R., Jr., *et al.*, 1590

PREGNANCY
Influence of maternal xylitol consumption on acquisition of mutans streptococci by infants, Söderling, E., *et al.*, 882

PREMATURE INFANTS (*see* Infant, Premature)

PREVENTIVE DENTISTRY
Road to preventive dentistry—the personal scientific experience of a Japanese dentist, The. Koga, T., 7

PRIONS
Prion protein is not detectable in dental pulp from patients with Creutzfeldt-Jakob disease. Blanquet-Grossard, F., *et al.*, 700

PROLIFERATING CELL NUCLEAR ANTIGEN
Development and characterization of a tissue-engineered human oral mucosa equivalent produced in a serum-free culture system. Izumi, K., *et al.*, 798

PROLINE
Association of basic proline-rich peptides from human parotid gland secretions with caries experience, The. Ayad, M., *et al.*, 976
Low levels of GRP-Ca expression in transgenic mice. Ten Hagen, K.G. and Balys, M.M., 926
Molecular mapping of statherin- and histatin-binding domains in human salivary mucin MG1 (MUC5B) by the yeast two-hybrid system, 732
Pellicle precursor protein crosslinking: characterization of an adduct between acidic proline-rich protein (PRP-1) and statherin generated by transglutaminase. Yao, Y., *et al.*, 930

PROSTAGLANDIN-ENDOPEROXIDE SYNTHASE
Cyclooxygenase-2-dependent prostaglandin E_2 down-regulates intercellular adhesion molecule-1 expression *via* EP_2/EP_4 receptors in interleukin-1β-stimulated human gingival fibroblasts. Noguchi, K., *et al.*, 1955

PROSTAGLANDINS
Prostaglandin E_2 enhances bradykinin-evoked iCGRP release in bovine dental pulp. Goodis, H.E., *et al.*, 1604
Prostaglandin E_2 predominantly induces production of hepatocyte growth factor/scatter factor in human dental pulp in acute inflammation. Ohnishi, T., *et al.*, 748

PROSTHESIS DESIGN
Design and wear testing of a temporomandibular joint prosthesis articulation. van Loon, J.-P., *et al.*, 715

PROTEIN, S-100 (*see* Nerve Tissue Protein S100)

PROTEIN BINDING
Cementum attachment protein enriches putative cementoblastic populations on root surfaces *in vitro*. BarKana, I., *et al.*, 1482

PROTEIN ISOFORMS
Mass spectrometry of native rat amelogenins: primary transcripts, secretory isoforms, and C-terminal degradation. Chen, W.-Y., *et al.*, 840

PROTEIN KINASES
Inositol hexasulphate, a casein kinase inhibitor, alters enamel formation in cultured embryonic mouse tooth germs. Torres-Quintana, M.A., *et al.*, 1794
Role of MAP kinases $p42^{erk-2}/p44^{erk-1}$ in cementum-derived attachment-protein-mediated cell attachment. Komaki, M., *et al.*, 1789

PROTEIN P53
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948

PROTEIN PRECURSORS
Association of basic proline-rich peptides from human parotid gland secretions with caries experience, The. Ayad, M., *et al.*, 976
Pellicle precursor protein crosslinking: characterization of an adduct between acidic proline-rich protein (PRP-1) and statherin generated by transglutaminase. Yao, Y., *et al.*, 930

PROTEIN-TYROSINE KINASE
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

PROTO-ONCOGENE PROTEINS, C-FOS
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

PSYCHOPHYSIOLOGY
Low unstimulated salivary flow and subjective oral dryness: association with medication, anxiety, depression, and stress. Bergdahl, M. and Bergdahl, J., 1652

PTERYGOID MUSCLES
Myosin isoform composition of the human medial and lateral pterygoid muscles. Korfage, J.A.M. and van Eijden, T.M.G.J., 1618

PULPITIS
Prostaglandin E_2 predominantly induces production of hepatocyte growth factor/scatter factor in human dental pulp in acute inflammation. Ohnishi, T., *et al.*, 748

QUALITY OF LIFE
Measuring the effect of intra-oral implant rehabilitation on health-related quality of life in a randomized controlled clinical trial. Awad, M.A., *et al.*, 1659
Self-perceived oral health status, psychological well-being, and life satisfaction in an older adult population. Locker, D., *et al.*, 970

QUESTIONNAIRES (*see* Dental Health Surveys)

RABBIT
EMG power spectrum and motor unit characteristics in the masseter muscle of the rabbit. Turkawski, S.J.J. and van Eijden, T.M.G.J., 950

RADIATION EFFECTS
AgNOR are sensitive markers of radiation lesions in squamous epithelia. Ielmini, M.V., *et al.*, 850

RADIOGRAPHY, DENTAL
Real performance of bitewing radiography and fiber-optic transillumination in approximal caries diagnosis, The. Vaarkamp, J., *et al.*, 1747
Relationship between the density of the alveolar processes and that of post-cranial bone, The. Southard, K.A., *et al.*, 964
Use of radiology practice guidelines and compliance with accreditation standards in US and Canadian dental schools. Kantor, M.L., 1532

RADIOIMMUNOASSAY
Prostaglandin E_2 enhances bradykinin-evoked iCGRP release in bovine dental pulp. Goodis, H.E., *et al.*, 1604

RADIOLIGAND ASSAY
Induction of intracellular interleukin-1β signals *via* type II interleukin-1 receptor in human gingival fibroblasts. Chou, H.-H., *et al.*, 1683

RADIUS
Relationship between the density of the alveolar processes and that of post-cranial bone, The. Southard, K.A., *et al.*, 964

RATS
AgNOR are sensitive markers of radiation lesions in squamous epithelia. Ielmini, M.V., *et al.*, 850
Biomechanical evaluation of osseous implants having different surface topographies in rats. Ogawa, T., *et al.*, 1857
Local and chronic application of PTH accelerates tooth movement in rats. Soma, S., *et al.*, 1717
Mandibular bone formation rates in aged ovariectomized rats treated with anti-resorptive agents alone and in combination with intermittent parathyroid hormone. Hunziker, J., *et al.*, 1431
Mass spectrometry of native rat amelogenins: primary transcripts, secretory isoforms, and C-terminal degradation. Chen, W.-Y., *et al.*, 840
Meal pattern analysis in response to temporomandibular joint inflammation in the rat. Harper, R.P., *et al.*, 1704
Osteoprotegerin and osteoclast differentiation factor in tooth eruption. Wise, G.E., *et al.*, 1937
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489
Region-specific bone mass changes in rat mandibular condyle following ovariectomy. Tanaka, M., *et al.*, 1907

REACTIVE OXYGEN SPECIES
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489

RECEPTOR PROTEIN-TYROSINE KINASES
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

RECEPTORS, BRADYKININ
Prostaglandin E_2 enhances bradykinin-evoked iCGRP release in bovine dental pulp. Goodis, H.E., *et al.*, 1604

RECEPTORS, CELL SURFACE
Immunohistochemical localization of Gαq, PLCβ, Gαi1-2, PKA, and the endothelin B and extracellular Ca^{2+}-sensing receptors during early amelogenesis. Moran, R.A., *et al.*, 1896

RECEPTORS, ENDOTHELIN
Immunohistochemical localization of Gαq, PLCβ, Gαi1-2, PKA, and the endothelin B and extracellular Ca^{2+}-sensing receptors during early amelogenesis. Moran, R.A., *et al.*, 1896

RECEPTORS, ESTROGEN
Estrogenicity of fissure sealants and adhesive resins determined by reporter gene assay. Tarumi, H., *et al.*, 1838

RECEPTORS, GROWTH FACTOR
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

RECEPTORS, INTERLEUKIN-1
Induction of intracellular interleukin-1β signals *via* type II interleukin-1 receptor in human gingival fibroblasts. Chou, H.-H., *et al.*, 1683

RECEPTORS, NICOTINIC
Choline acetyltransferase, acetylcholinesterase, and nicotinic acetylcholine receptors of human gingival and esophageal epithelia. Thuong Nguyen, V., *et al.*, 939

RECEPTORS, PROSTAGLANDIN E
Cyclooxygenase-2-dependent prostaglandin E_2 down-regulates intercellular adhesion molecule-1 expression *via* EP_2/EP_4 receptors in interleukin-1β-stimulated human gingival fibroblasts. Noguchi, K., *et al.*, 1955

REFLEX
Elevated intramuscular concentration of bradykinin in jaw muscle increases the fusimotor drive to neck muscles in the cat. Hellström, F., *et al.*, 1815

REFLEX, STRETCH
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626

REFRACTOMETRY
Optical scattering power for characterization of mineral loss. Ko, C.C., *et al.*, 1584

RELAXATION TECHNIQUES
Relaxation *vs.* cognitively oriented therapies for dental fear. Berggren, U., *et al.*, 1645

RESEARCH
Are all clinical caries prevention studies biased? Alanen, P., 796
Between-subject and within-subject statistical information in dental research. Mancl, L.A., *et al.*, 1778
"DentalResearch2000.org." Offenbacher, S., 1537
Forty-four years of dental research: role of education, teachers, research, and teaching. Hausmann, E., 1546
From osseointegration to osseoperception. van Steenberghe, D., 1833
International collaborative research on fluoride. Cohen, L., *et al.*, 893
Odontoblast differentiation and tooth morphogenesis. Lesot, H., 1640
Temporomandibular disorders: moving from a dentally based to a medically based model. Greene, C.S. and Laskin, D.M., 1736
World of oral research, The: how do we improve it? Jeffcoat, M.K., 1448

RESIN CEMENTS
Antibacterial activities and release kinetics of a newly developed recoverable controlled agent-release system. Ehara, A., *et al.*, 824
Bond strength of resin to acid-etched dentin studied by ^{13}C NMR: interaction between N-methacryloyl-ω-amino acid primer and dentinal collagen. Nishiyama, N., *et al.*, 806
Effects of whisker-to-silica ratio on the reinforcement of dental resin composites with silica-fused whiskers. Xu, H.H.K., *et al.*, 1844
Estrogenicity of fissure sealants and adhesive resins determined by reporter gene assay. Tarumi, H., *et al.*, 1838
Improved sealant retention with bonding agents: a clinical study of two-bottle and single-bottle systems. Feigal, R.J., *et al.*, 1850
In vivo degradation of resin-dentin bonds in humans over 1 to 3 years. Hashimoto, M., *et al.*, 1385
Interfacial chemistry of the dentin/adhesive bond. Spencer, P., *et al.*, 1458
Visco-elastic parameters of dental restorative materials during setting. Dauvillier, B.S., *et al.*, 818
Whisker-reinforced heat-cured dental resin composites: effects of filler level and heat-cure temperature and time. Xu, H.H.K., 1392

RESPIRATORY SYSTEM
Effects of head and body position on two- and three-dimensional configurations of the upper airway. Ono, T., *et al.*, 1879

RESTRICTION FRAGMENT LENGTH POLYMORPHISM (*see* Polymorphism, Restriction Fragment Length)

REVERSE TRANSCRIPTASE POLYMERASE CHAIN REACTION
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675
Cytokine profiles of T-lymphocytes from gingival tissues with pathological pocketing. Takeichi, O., *et al.*, 1548
Expression of MMP-8 in human odontoblasts and dental pulp cells is down-regulated by TGF-β1, The.. Palosaari, H., *et al.*, 77
Expression of mRNAs encoding for α and β integrin subunits, MMPs, and TIMPs in stretched human periodontal ligament and gingival fibroblasts. Bolcato-Bellemin, A.L., *et al.*, 1712
Induction of intracellular interleukin-1β signals *via* type II interleukin-1 receptor in human gingival fibroblasts. Chou, H.-H., *et al.*, 1683
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

RISK FACTORS
Acute-phase inflammatory response to periodontal disease in the US population. Slade, G.D., *et al.*, 49
Between-subject and within-subject statistical information in dental research. Mancl, L.A., *et al.*, 1778

RNA, MESSENGER
Cytokine profiles of T-lymphocytes from gingival tissues with pathological pocketing. Takeichi, O., *et al.*, 1548
Delayed embryonic development of mouse masseter muscle correlates with delayed myoD family expression. Yamane, A., *et al.*, 1933
Expression of mRNAs encoding for α and β integrin subunits, MMPs, and TIMPs in stretched human periodontal ligament and gingival fibroblasts. Bolcato-Bellemin, A.L., *et al.*, 1712
High glucose suppresses cathepsin activity in periodontal-ligament-derived fibroblastic

cells. Nishimura, F., *et al.*, 1614
Induction of intracellular interleukin-1β signals *via* type II interleukin-1 receptor in human gingival fibroblasts. Chou, H.-H., *et al.*, 1683
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

RNA, VIRAL
Proviral HIV-1 DNA in gingival crevicular fluid of HIV-1-infected patients in various stages of HIV disease. Maticic, M., *et al.*, 1496

ROOT CANAL PREPARATION
Three-dimensional analysis of root canal geometry by high-resolution computed tomography. Peters, O.A., *et al.*, 1405

ROSAN, BURTON
Philadelphia story, A—featuring Ned Williams: microbiology at the University of Pennsylvania School of Dental Medicine. Rosan, B. and Hammond, B.F., 1451

ROUKEMA, PIET
Historical development of salivary research in The Netherlands, The. Nieuw Amerongen, A.V., *et al.*, 1928

SALIVA
Composition of plaque and saliva following use of an α-tricalcium-phosphate-containing chewing gum and a subsequent sucrose challenge. Vogel, G.L., *et al.*, 58
Expression of the antimicrobial peptide, human β-defensin 1, in duct cells of minor salivary glands and detection in saliva. Sahasrabudhe, K.S., *et al.*, 1669
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740
Immunoquantification of human salivary mucins MG1 and MG2 in stimulated whole saliva: factors influencing mucin levels. Rayment, S.A., *et al.*, 1765
Influence of environmental pH on the reactivity of *Candida albicans* with salivary IgA. Bikandi, J., *et al.*, 1439
Proviral HIV-1 DNA in gingival crevicular fluid of HIV-1-infected patients in various stages of HIV disease. Maticic, M., *et al.*, 1496

SALIVARY GLANDS
Adenoviral-mediated gene transfer to mouse salivary glands. Wang, S., *et al.*, 701
Association of basic proline-rich peptides from human parotid gland secretions with caries experience, The. Ayad, M., *et al.*, 976
Association of salivary flow rates with maximal bite force. Yeh, C.-K., *et al.*, 1560
Determination of variation of stimulated salivary flow rates. Ghezzi, E.M., *et al.*, 1874
Expression of the antimicrobial peptide, human β-defensin 1, in duct cells of minor salivary glands and detection in saliva. Sahasrabudhe, K.S., *et al.*, 1669
Historical development of salivary research in The Netherlands, The. Nieuw Amerongen, A.V., *et al.*, 1928
Low levels of GRP-Ca expression in transgenic mice. Ten Hagen, K.G. and Balys, M.M., 926
Prevalence of xerostomia and salivary gland hypofunction in a cohort of HIV-positive and at-risk women, The. Navazesh, M., *et al.*, 1502

SALIVARY PROTEINS
Association of basic proline-rich peptides from human parotid gland secretions with caries experience, The. Ayad, M., *et al.*, 976
Low levels of GRP-Ca expression in transgenic mice. Ten Hagen, K.G. and Balys, M.M., 926
Molecular mapping of statherin- and histatin-binding domains in human salivary mucin MG1 (MUC5B) by the yeast two-hybrid system, 732
Pellicle precursor protein crosslinking: characterization of an adduct between acidic proline-rich protein (PRP-1) and statherin generated by transglutaminase. Yao, Y., *et al.*, 930

SALIVATION
Association of salivary flow rates with maximal bite force. Yeh, C.-K., *et al.*, 1560
Determination of variation of stimulated salivary flow rates. Ghezzi, E.M., *et al.*, 1874
Low unstimulated salivary flow and subjective oral dryness: association with medication, anxiety, depression, and stress. Bergdahl, M. and Bergdahl, J., 1652

SANIDINE
High-temperature x-ray diffraction measurement of sanidine thermal expansion. Mackert, J.R., Jr., *et al.*, 1590

SCALING, SUBGINGIVAL (*see* Dental Scaling)

SCATTER FACTOR (*see* Hepatocyte Growth Factor)

SCATTERING, RADIATION
Optical scattering power for characterization of mineral loss. Ko, C.C., *et al.*, 1584

SCHOOLS, DENTAL
Philadelphia story, A—featuring Ned Williams: microbiology at the University of Pennsylvania School of Dental Medicine. Rosan, B. and Hammond, B.F., 1451
Use of radiology practice guidelines and compliance with accreditation standards in US and Canadian dental schools. Kantor, M.L., 1532

SDS-PAGE (*see* Electrophoresis, Polyacrylamide Gel)

SEALANTS (*see* Pit and Fissure Sealants)

SEASONS
Time-dependent decrease and seasonal variation of the porosity of recently erupted sound dental enamel *in vivo*. ten Bosch, J.J., *et al.*, 1556

SEQUENCE ANALYSIS, DNA
Cloning, characterization, and expression analysis of mouse enamelysin. Caterina, J., *et al.*, 1697
Non-collagenous dentin matrix proteins are involved in dentinogenesis imperfecta type II (DGI-II), The. Thotakura, S.R., *et al.*, 835
PTCH gene mutations in odontogenic keratocysts. Barreto, D.C., *et al.*, 1418

SEQUENCE ANALYSIS, PROTEIN
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740

SERINE ENDOPEPTIDASES
Localization of EMSP1 expression during tooth formation and cloning of mouse cDNA. Hu, J.C.-C., *et al.*, 70

SHEAR BOND STRENGTH
Nominal shear or fracture mechanics in the assessment of composite-dentin adhesion? Tantbirojn, D., *et al.*, 41

SIALOGLYCOPROTEINS
Cementum attachment protein enriches putative cementoblastic populations on root surfaces *in vitro*. BarKana, I., *et al.*, 1482
Non-collagenous dentin matrix proteins are involved in dentinogenesis imperfecta type II (DGI-II), The. Thotakura, S.R., *et al.*, 835

SIALOGRAPHY
Adenoviral-mediated gene transfer to mouse salivary glands. Wang, S., *et al.*, 701

SIGNAL TRANSDUCTION
Immunohistochemical localization of Gαq, PLCβ, Gαi1-2, PKA, and the endothelin B and extracellular Ca^{2+}-sensing receptors during early amelogenesis. Moran, R.A., *et al.*, 1896
Induction of intracellular interleukin-1β signals *via* type II interleukin-1 receptor in human gingival fibroblasts. Chou, H.-H., *et al.*, 1683
Inhibition of Wnt signaling by exogenous Mfrzb1 protein affects molar tooth size. Sarkar, L. and Sharpe, P.T., 920
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

SILICA
Effects of whisker-to-silica ratio on the reinforcement of dental resin composites with silica-fused whiskers. Xu, H.H.K., *et al.*, 1844
Whisker-reinforced heat-cured dental resin composites: effects of filler level and heat-cure temperature and time. Xu, H.H.K., 1392

SILVER STAINING
AgNOR are sensitive markers of radiation lesions in squamous epithelia. Ielmini, M.V., *et al.*, 850

SKIN
Collagen XII mutation disrupts matrix structure of periodontal ligament and skin. Reichenberger, E. , *et al.*, 1962

SKIN, ARTIFICIAL
Development and characterization of a tissue-engineered human oral mucosa equivalent produced in a serum-free culture system. Izumi, K., *et al.*, 798

SLEEP APNEA, OBSTRUCTIVE
Effects of head and body position on two- and three-dimensional configurations of the upper airway. Ono, T., *et al.*, 1879

SMOKING
Polymorphisms in the IL-1A gene are correlated with levels of interleukin-1α protein in gingival crevicular fluid of teeth with severe periodontal disease. Shirodaria, S., *et al.*, 1864

SOCIAL ENVIRONMENT
Self-perceived oral health status, psychological well-being, and life satisfaction in an older adult population. Locker, D., *et al.*, 970

SODIUM FLUORIDE
Effect of *in vitro* acidification on plaque fluid composition with and without a NaF or a controlled-release fluoride rinse. Vogel, G.L., *et al.*, 983
Remineralization effects of a two-solution fluoride mouthrinse: an *in situ* study. Chow, L.C., *et al.*, 991

SPECTROMETRY, MASS, MATRIX-ASSISTED LASER DESORPTION-IONIZATION
MALDI-TOF MS analysis of a library of polymerizable cyclodextrin derivatives. Bowen, R.L., *et al.*, 905
Mass spectrometry of native rat amelogenins: primary transcripts, secretory isoforms, and C-terminal degradation. Chen, W.-Y., *et al.*, 840

SPECTROMETRY, X-RAY EMISSION, ELECTRON MICROSCOPIC (*see* Electron probe microanalysis)

SPECTROPHOTOMETRY, ATOMIC ABSORPTION
Diagnostic value of a chelating agent in patients with symptoms allegedly caused by amalgam fillings. Vamnes, J.S., *et al.*, 868

SPECTROSCOPY
Temperature dependence of the electrical resistance of sound and carious teeth. Huysmans, M.C.D.N.J.M., *et al.*, 1464

SPECTROSCOPY, FOURIER TRANSFORM INFRARED
Feasibility of computer-assisted recognition of dif-

ferent dental hard tissues. Kocher, T., *et al.*, 829

SPECTRUM ANALYSIS, MASS
Human gingival crevicular fluid contains MRP8 (S100A8) and MRP14 (S100A9), two calcium-binding proteins of the S100 family. Kojima, T., *et al.*, 740
Mass spectrometry of native rat amelogenins: primary transcripts, secretory isoforms, and C-terminal degradation. Chen, W.-Y., *et al.*, 840
N-terminal sequence analysis of bovine dentin phosphophoryn after conversion of phosphoseryl to *S*-propylcysteinyl residues. Huq, N.L., *et al.*, 1914

SPECTRUM ANALYSIS, RAMAN
Interfacial chemistry of the dentin/adhesive bond. Spencer, P., *et al.*, 1458

SQUAMOUS CELL CANCER (*see* Neoplasms, Squamous Cell)

STATHERIN
Molecular mapping of statherin- and histatin-binding domains in human salivary mucin MG1 (MUC5B) by the yeast two-hybrid system, 732
Pellicle precursor protein crosslinking: characterization of an adduct between acidic proline-rich protein (PRP-1) and statherin generated by transglutaminase. Yao, Y., *et al.*, 930

STATISTICS
Between-subject and within-subject statistical information in dental research. Mancl, L.A., *et al.*, 1778

STEM CELL FACTOR
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675

STREPTOCOCCUS MUTANS
Antibacterial activities and release kinetics of a newly developed recoverable controlled agent-release system. Ehara, A., *et al.*, 824
Effects of organic acid anions on growth, glycolysis, and intracellular pH of oral streptococci. Dashper, S.G. and Reynolds, E.C., 90
Influence of maternal xylitol consumption on acquisition of mutans streptococci by infants, Söderling, E., *et al.*, 882
Interactions of human neutrophils with the constituents of an experimental dental biofilm, The. Shapira, L., *et al.*, 1802
Occurrence of dental decay in children after maternal consumption of xylitol chewing gum, a follow-up from 0 to 5 years. Isokangas, P., *et al.*, 1885
Relationship among mutans streptococci, "low-pH" bacteria, and iodophilic polysaccharide-producing bacteria in dental plaque and early enamel caries in humans. van Ruyven, F.O.J., *et al.*, 778
Water-insoluble glucan synthesis by mutans streptococcal strains correlates with caries incidence in 12- to 30-month-old children. Mattos-Graner, R.O., *et al.*, 1371

STREPTOCOCCUS SANGUIS
Effects of organic acid anions on growth, glycolysis, and intracellular pH of oral streptococci. Dashper, S.G. and Reynolds, E.C., 90

STREPTOCOCCUS SOBRINUS
Water-insoluble glucan synthesis by mutans streptococcal strains correlates with caries incidence in 12- to 30-month-old children. Mattos-Graner, R.O., *et al.*, 1371

STRESS, MECHANICAL
Design and wear testing of a temporomandibular joint prosthesis articulation. van Loon, J.-P., *et al.*, 715
Effects of adhesive thickness on polymerization contraction stress of composite, The. Choi, K.K., *et al.*, 812
Effects of whisker-to-silica ratio on the reinforcement of dental resin composites with silica-fused whiskers. Xu, H.H.K., *et al.*, 1844
Expression of mRNAs encoding for α and β integrin subunits, MMPs, and TIMPs in stretched human periodontal ligament and gingival fibroblasts. Bolcato-Bellemin, A.L., *et al.*, 1712
H^+-induced tension development in demineralized dentin matrix. Pashley, D.H., *et al.*, 1579
Lifetime-limiting strength degradation from contact fatigue in dental ceramics. Jung, Y.-G., *et al.*, 722
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489
Region-specific bone mass changes in rat mandibular condyle following ovariectomy. Tanaka, M., *et al.*, 1907
Stress-field translation in the healthy human temporomandibular joint. Gallo, L.M., *et al.*, 1740
Three-dimensional cancellous bone architecture of the human mandibular condyle, The. Giesen, E.B.W. and van Eijden, T.M.G.J., 957
Visco-elastic parameters of dental restorative materials during setting. Dauvillier, B.S., *et al.*, 818

STRESS, PSYCHOLOGICAL
Low unstimulated salivary flow and subjective oral dryness: association with medication, anxiety, depression, and stress. Bergdahl, M. and Bergdahl, J., 1652

SUBMANDIBULAR GLAND
Adenoviral-mediated gene transfer to mouse salivary glands. Wang, S., *et al.*, 701
Determination of variation of stimulated salivary flow rates. Ghezzi, E.M., *et al.*, 1874
Low levels of GRP-Ca expression in transgenic mice. Ten Hagen, K.G. and Balys, M.M., 926

SUCROSE
Composition of plaque and saliva following use of an α-tricalcium-phosphate-containing chewing gum and a subsequent sucrose challenge. Vogel, G.L., *et al.*, 58
Water-insoluble glucan synthesis by mutans streptococcal strains correlates with caries incidence in 12- to 30-month-old children. Mattos-Graner, R.O., *et al.*, 1371

SULFUR
Morning breath odor: influence of treatments on sulfur gases. Suarez, F.L., *et al.*, 1773

SUPEROXIDE DISMUTASE
Immunolocalization and adenoviral vector-mediated manganese superoxide-dismutase gene transfer to experimental oral tumors. Lam, E.W.N., *et al.*, 1410
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489

SUPEROXIDES
Interactions of human neutrophils with the constituents of an experimental dental biofilm, The. Shapira, L., *et al.*, 1802

SUPINE POSITION
Effects of head and body position on two- and three-dimensional configurations of the upper airway. Ono, T., *et al.*, 1879

SURFACE PROPERTIES
Biomechanical evaluation of osseous implants having different surface topographies in rats. Ogawa, T., *et al.*, 1857
Effects of low-energy CO_2 laser irradiation and the organic matrix on inhibition of enamel demineralization. Hsu, C.-Y.S., *et al.*, 1725
Evidence for charge domains on developing enamel crystal surfaces. Kirkham, J., *et al.*, 1943

SURFACE TENSION
H^+-induced tension development in demineralized dentin matrix. Pashley, D.H., *et al.*, 1579

SWINE
Dose-dependent modulation of octacalcium phosphate crystal habit by amelogenins. Wen, H.B., *et al.*, 1902
Localization of EMSP1 expression during tooth formation and cloning of mouse cDNA. Hu, J.C.-C., *et al.*, 70

SYNAPTIC TRANSMISSION
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626

SYNOVIAL FLUID
Antibodies against mycobacterial antigens in the synovial fluid of patients with temporomandibular disorders. Adachi, N., *et al.*, 1752
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489

T-LYMPHOCYTES
Butyric-acid-induced apoptosis in murine thymocytes and splenic T- and B-cells occurs in the absence of p53. Kurita-Ochiai, T., *et al.*, 1948
Cytokine profiles of T-lymphocytes from gingival tissues with pathological pocketing. Takeichi, O., *et al.*, 1548

TEMPERATURE
Temperature dependence of the electrical resistance of sound and carious teeth. Huysmans, M.C.D.N.J.M., *et al.*, 1464
Whisker-reinforced heat-cured dental resin composites: effects of filler level and heat-cure temperature and time. Xu, H.H.K., 1392

TEMPORAL MUSCLE
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626

TEMPOROMANDIBULAR JOINT
Design and wear testing of a temporomandibular joint prosthesis articulation. van Loon, J.-P., *et al.*, 715
Meal pattern analysis in response to temporomandibular joint inflammation in the rat. Harper, R.P., *et al.*, 1704
Reactive oxygen species participation in experimentally induced arthritis of the temporomandibular joint in rats. Kawai, Y., *et al.*, 1489

TEMPOROMANDIBULAR JOINT DISK
Stress-field translation in the healthy human temporomandibular joint. Gallo, L.M., *et al.*, 1740

TEMPOROMANDIBULAR JOINT DISORDERS
Antibodies against mycobacterial antigens in the synovial fluid of patients with temporomandibular disorders. Adachi, N., *et al.*, 1752
Elevated intramuscular concentration of bradykinin in jaw muscle increases the fusimotor drive to neck muscles in the cat. Hellström, F., *et al.*, 1815
Mandibular helical axis pathways during mastication. Gallo, L.M., *et al.*, 1566
No heritability of temporomandibular joint signs and symptoms. Michalowicz, B.S., *et al.*, 1573
Temporomandibular disorders: moving from a dentally based to a medically based model. Greene, C.S. and Laskin, D.M., 1736

TENSILE STRENGTH
Effects of adhesive thickness on polymerization contraction stress of composite, The. Choi, K.K., *et al.*, 812
In vivo degradation of resin-dentin bonds in humans over 1 to 3 years. Hashimoto, M., *et al.*, 1385
Visco-elastic parameters of dental restorative materials during setting. Dauvillier, B.S., *et al.*, 818

TESTING OF MATERIALS (*see* Materials Testing)

THERMAL EXPANSION
High-temperature x-ray diffraction measurement of sanidine thermal expansion. Mackert, J.R., Jr., *et al.*, 1590

TIME FACTORS
Time-dependent decrease and seasonal variation of the porosity of recently erupted sound dental enamel *in vivo*. ten Bosch, J.J., *et al.*, 1556
Whisker-reinforced heat-cured dental resin composites: effects of filler level and heat-cure temperature and time. Xu, H.H.K., 1392

TISSUE INHIBITOR OF METALLOPROTEINASES
Expression of mRNAs encoding for α and β integrin subunits, MMPs, and TIMPs in stretched human periodontal ligament and gingival fibroblasts. Bolcato-Bellemin, A.L., *et al.*, 1712

TITANIUM
Biomechanical evaluation of osseous implants having different surface topographies in rats. Ogawa, T., *et al.*, 1857
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675

TOMOGRAPHY, X-RAY COMPUTED
Quantification of periapical bone destruction in mice by micro-computed tomography. Balto, K., *et al.*, 35
Three-dimensional analysis of root canal geometry by high-resolution computed tomography. Peters, O.A., *et al.*, 1405
Three-dimensional cancellous bone architecture of the human mandibular condyle, The. Giesen, E.B.W. and van Eijden, T.M.G.J., 957

TONGUE
Delayed embryonic development of mouse masseter muscle correlates with delayed myoD family expression. Yamane, A., *et al.*, 1933
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626
Morning breath odor: influence of treatments on sulfur gases. Suarez, F.L., *et al.*, 1773

TOOTH
Controlled study of the morphometric changes in the primary dentition of pre-term, very-low-birthweight children, A. Seow, W.K. and Wan, A., 63
Feasibility of computer-assisted recognition of different dental hard tissues. Kocher, T., *et al.*, 829
Her name is "Lucy," our three-million-year-old ancestor. Shields, E.D., 13
Temperature dependence of the electrical resistance of sound and carious teeth. Huysmans, M.C.D.N.J.M., *et al.*, 1464

TOOTH ABNORMALITIES
Clinical, radiographic, and genetic evaluation of a novel form of autosomal-dominant oligodontia. Goldenberg, M., *et al.*, 1469

TOOTH DEMINERALIZATION
Effects of low-energy CO_2 laser irradiation and the organic matrix on inhibition of enamel demineralization. Hsu, C.-Y.S., *et al.*, 1725
Optical scattering power for characterization of mineral loss. Ko, C.C., *et al.*, 1584

TOOTH ERUPTION
Osteoprotegerin and osteoclast differentiation factor in tooth eruption. Wise, G.E., *et al.*, 1937
Time-dependent decrease and seasonal variation of the porosity of recently erupted sound dental enamel *in vivo*. ten Bosch, J.J., *et al.*, 1556

TOOTH GERM
Immunohistochemical detection and distribution of enamelysin (MMP-20) in human odontogenic tumors. Takata, T., *et al.*, 1608
Inositol hexasulphate, a casein kinase inhibitor, alters enamel formation in cultured embryonic mouse tooth germs. Torres-Quintana, M.A., *et al.*, 1794

TOOTH LOSS
Acute-phase inflammatory response to periodontal disease in the US population. Slade, G.D., *et al.*, 49

TOOTH MOBILITY
Expression of mRNAs encoding for α and β integrin subunits, MMPs, and TIMPs in stretched human periodontal ligament and gingival fibroblasts. Bolcato-Bellemin, A.L., *et al.*, 1712

TOOTH MOVEMENT
Local and chronic application of PTH accelerates tooth movement in rats. Soma, S., *et al.*, 1717

TOOTH REMINERALIZATION
Remineralization effects of a two-solution fluoride mouthrinse: an *in situ* study. Chow, L.C., *et al.*, 991

TOOTH ROOT
Cementum attachment protein enriches putative cementoblastic populations on root surfaces *in vitro*. BarKana, I., *et al.*, 1482
Three-dimensional analysis of root canal geometry by high-resolution computed tomography. Peters, O.A., *et al.*, 1405

TOOTHBRUSHING
Morning breath odor: influence of treatments on sulfur gases. Suarez, F.L., *et al.*, 1773

TRANSCRIPTION, GENETIC
High glucose suppresses cathepsin activity in periodontal-ligament-derived fibroblastic cells. Nishimura, F., *et al.*, 1614

TRANSCRIPTION FACTOR AP-1
Role of vascular endothelial growth factor in human dental pulp cells: induction of chemotaxis, proliferation, and differentiation and activation of the AP-1-dependent signaling pathway, The. Matsushita, K., *et al.*, 1596

TRANSCRIPTION FACTORS
Clinical, radiographic, and genetic evaluation of a novel form of autosomal-dominant oligodontia. Goldenberg, M., *et al.*, 1469

TRANSFORMING GROWTH FACTOR BETA
Cytokine production and bone remodeling in patients wearing overdentures on oral implants. Schierano, G., *et al.*, 1675
Effects of TGFβ1 on dental pulp cells in cultured human tooth slices. Melin, M., *et al.*, 1689
Expression of MMP-8 in human odontoblasts and dental pulp cells is down-regulated by TGF-β1, The. Palosaari, H., *et al.*, 77
High glucose suppresses cathepsin activity in periodontal-ligament-derived fibroblastic cells. Nishimura, F., *et al.*, 1614

TRANSGLUTAMINASE
Pellicle precursor protein crosslinking: characterization of an adduct between acidic proline-rich protein (PRP-1) and statherin generated by transglutaminase. Yao, Y., *et al.*, 930

TRANSILLUMINATION
Real performance of bitewing radiography and fiber-optic transillumination in approximal caries diagnosis, The. Vaarkamp, J., *et al.*, 1747

TREATMENT OUTCOME
Relaxation *vs.* cognitively oriented therapies for dental fear. Berggren, U., *et al.*, 1645

TRIGEMINAL NUCLEI
Jaw-tongue reflex: afferents, central pathways, and synaptic potentials in hypoglossal motoneurons in the cat. Ishiwata, Y., *et al.*, 1626

TUMOR CELLS, CULTURED
Electron microscopy, micro-analysis, and x-ray diffraction characterization of the mineral-like tissue deposited by human cementum tumor-derived cells. Arzate, H., *et al.*, 28

TUMOR NECROSIS FACTOR
Cytokine responses of oral epithelial cells to *Porphyromonas gingivalis* infection. Sandros, J., *et al.*, 1808

TUMOR SUPPRESSOR GENES (*see* Genes, Suppressor, Tumor)

TWINS
No heritability of temporomandibular joint signs and symptoms. Michalowicz, B.S., *et al.*, 1573

TYROSINE KINASE (*see* Protein-Tyrosine Kinase)

UNITHIOL
Diagnostic value of a chelating agent in patients with symptoms allegedly caused by amalgam fillings. Vamnes, J.S., *et al.*, 868

UNIVERSITY OF PENNSYLVANIA SCHOOL OF DENTAL MEDICINE
Philadelphia story, A—featuring Ned Williams: microbiology at the University of Pennsylvania School of Dental Medicine. Rosan, B. and Hammond, B.F., 1451

VACCINES
Antigenic specificity of gingival crevicular fluid antibody to *Actinobacillus actinomycetemcomitans*. Ebersole, J.L., *et al.*, 1362

VASCULAR ENDOTHELIAL GROWTH FACTOR (*see* Endothelial Growth Factor)

VECTORS (*see* Genetic Vectors)

VIRULENCE
Water-insoluble glucan synthesis by mutans streptococcal strains correlates with caries incidence in 12- to 30-month-old children. Mattos-Graner, R.O., *et al.*, 1371

VISCOSITY
Visco-elastic parameters of dental restorative materials during setting. Dauvillier, B.S., *et al.*, 818

WATER FLUORIDATION (*see* Fluoridation)

WEAR (*see* Dental Restoration Wear)

WEAR TESTING (*see* Materials Testing)

WHISKERS (*see* Ceramics)

WILLIAMS, NED BLANCHARD
Philadelphia story, A—featuring Ned Williams: microbiology at the University of Pennsylvania School of Dental Medicine. Rosan, B. and Hammond, B.F., 1451

WNT PROTEINS (*see* Signal Transduction)

WOMEN
Prevalence of xerostomia and salivary gland hypofunction in a cohort of HIV-positive and at-risk women, The. Navazesh, M., *et al.*, 1502
Relationship between the density of the alveolar processes and that of post-cranial bone, The. Southard, K.A., *et al.*, 964

WOUND HEALING
Effects of TGFβ1 on dental pulp cells in cultured human tooth slices. Melin, M., *et al.*, 1689
Local injection of IFN-gamma reduces the number of myofibroblasts and the collagen content in palatal wounds. Cornelissen, A.M.H., *et al.*, 1782

X-RAY DIFFRACTION
Electron microscopy, micro-analysis, and x-ray

diffraction characterization of the mineral-like tissue deposited by human cementum tumor-derived cells. Arzate, H., *et al.*, 28
High-temperature x-ray diffraction measurement of sanidine thermal expansion. Mackert, J.R., Jr., *et al.*, 1590

XENOBIOTICS
Estrogenicity of fissure sealants and adhesive resins determined by reporter gene assay. Tarumi, H., *et al.*, 1838

XEROSTOMIA
Determination of variation of stimulated salivary flow rates. Ghezzi, E.M., *et al.*, 1874
Low unstimulated salivary flow and subjective oral dryness: association with medication, anxiety, depression, and stress. Bergdahl, M. and Bergdahl, J., 1652
Prevalence of xerostomia and salivary gland hypofunction in a cohort of HIV-positive and at-risk women, The. Navazesh, M., *et al.*, 1502

XYLITOL
Influence of maternal xylitol consumption on acquisition of mutans streptococci by infants, Söderling, E., *et al.*, 882
Occurrence of dental decay in children after maternal consumption of xylitol chewing gum, a follow-up from 0 to 5 years. Isokangas, P., *et al.*, 1885
Rocky road of xylitol to its clinical application, The. Mäkinen, K.K., 1352

YEASTS
Molecular mapping of statherin- and histatin-binding domains in human salivary mucin MG1 (MUC5B) by the yeast two-hybrid system, 732

YOUNG'S MODULUS
Visco-elastic parameters of dental restorative materials during setting. Dauvillier, B.S., *et al.*, 818

ZIRCONIUM
Lifetime-limiting strength degradation from contact fatigue in dental ceramics. Jung, Y.-G., *et al.*, 722
